

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

Pharmaceutical

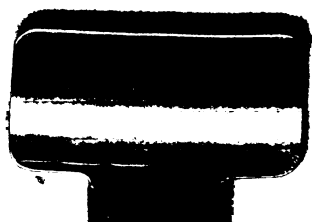

Association

**Report of Proceedings
Twenty-Seventh Annual Meeting**

PEORIA, JUNE, 1906

School of Pharmacy of Northwestern University

NORTHWESTERN UNIVERSITY BUILDING, CHICAGO

It has the most extensive pharmaceutical college equipment in America.

Its teachers and assistants give their whole time and attention to the School of Pharmacy and its students. They have no other classes and no other employment. It is their ambition to make this in every way the most practical training school for pharmacists.

The courses of instruction occupy the students' time, five days weekly, to the best advantage.

It has the largest annual attendance of any school of pharmacy in the West.

Twenty-first year begins September 24, 1906.

FOR FURTHER INFORMATION APPLY TO THE DEAN,
SCHOOL OF PHARMACY, 87 LAKE STREET, CHICAGO

NEW YORK

...WYETH'S... Standard Powdered Extracts

Will be found entirely divested of the slightest evidence of oxidation, possessing the well-defined physical characteristics of the respective drugs from which they are derived, such as odor, taste and color, and retaining in a concentrated condition the original proximate principles of the drugs. The transition has been effected through the introduction and perfection of an improved system of vacuum distillation, enabling us to concentrate the various percolates to complete dryness, protected during the operation from the destructive oxidizing influence of the air, thus insuring a preservation of the sensitive alkaloids and perishable constituents. Too much stress cannot be laid upon the importance of exercising the utmost discrimination on the part of the apothecary in the selection of Powdered Extracts; for if not made by the vacuum process, they must necessarily suffer much deterioration.

Put up in 1-Ounce and 1-Pound Bottles, or in Larger Quantities. Sufficient space always being reserved in the container to allow perfect mobility, thus preventing "caking," so characteristic of this delicate class of products.

JOHN WYETH & BROTHER

(INCORPORATED)

PHILADELPHIA, PENN.

No Guesswork when you supply our Standardized Products

THERE is one method—*only one*—by which the medicinal worth of drugs can be definitely determined before administration. That method is by assay, chemical or physiological—the latter in the case of those important and powerful drugs which cannot be standardized by chemical processes. That method is *our* method.

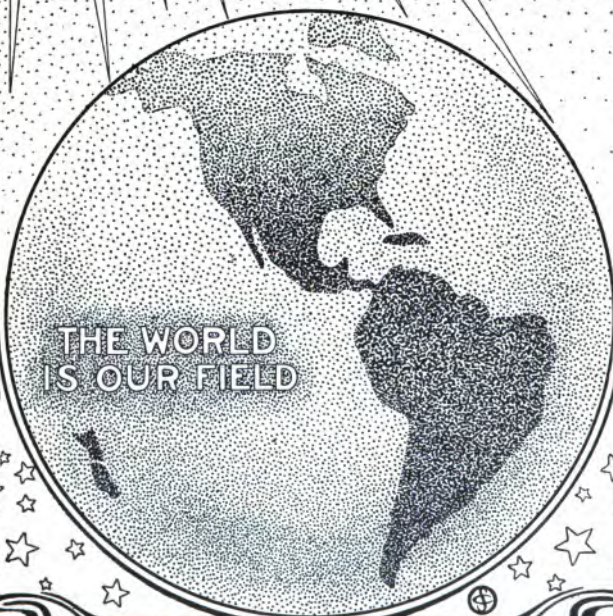

We standardize our fluid, solid and powdered extracts, and concentrations. We have done so for many years. We were pioneers in both chemical and physiological standardization. When you supply our pharmaceuticals you do so with positive assurance of their activity and uniformity.

THE WORLD
IS OUR FIELD

SYRUP OF FIGS

We manufacture an excellent laxative remedy and advertise extensively to make business for the drug trade and ourselves.

We do not claim to excel in other things, but we endeavor to do one thing well and to give satisfaction to the trade.

We appreciate the friendly interest which druggists generally have taken in the sales of our remedy, Syrup of Figs, and we thank them most cordially. We are, yours truly,

CONSTITUTION AND BY-LAWS

OF THE

ILLINOIS PHARMACEUTICAL ASSOCIATION.

CONSTITUTION.

ARTICLE I.

This association shall be called the Illinois Pharmaceutical Association.

ARTICLE II.

The object of this organization shall be to promote the advancement of pharmacy and those engaged in its practice to a higher professional standard; the support and encouragement of education for a more thorough preliminary schooling and greater scientific requirements for the practice of pharmacy, and regulation of the various grades of pharmaceutical service; the promotion of the commercial interests of pharmacists through the exploitation of new ideas, and united movements for improving the drug business; the fostering of literature, improvements and inventions, but discouraging the manufacture and sale of secret medicines to the medical profession and the public; to endeavor to propose such changes in the pharmacy law as may, from time to time, be indicated for the better protection of the public against inferior, adulterated, or dangerous drugs and medicines, and careless, ignorant, or incompetent compounding and sale of drugs and medicines.

ARTICLE III.

Section 1. This association shall consist of active, associate and honorary members.

Sec. 2. No person, except a registered pharmacist in the State of Illinois whose name shall appear on the register of the board of pharmacy, shall be eligible to active membership in this association.

Sec. 3. Any pharmacist in good professional and moral standing, who shall have attained the age of twenty-one years, residing in the State, whether in business for himself or in the employ of another pharmacist, shall be eligible to associate membership, but shall not vote or hold office in this association.

Sec. 4. Pharmacists and chemists, and other scientific men, who may be thought worthy of the distinction, may be elected honorary members. They shall not, however, be required to contribute to the funds, nor shall they be eligible to hold office or vote at the meetings.

PROCEEDINGS OF THE

ARTICLE IV.

The officers of this association shall be a president and three vice-presidents, a permanent secretary, a local secretary (to be elected from or near the place of next meeting), a treasurer and an executive committee consisting of one member from each congressional district in this State (and of which committee the president, secretary and treasurer shall be *ex-officio* members), all of whom shall be elected annually, and shall hold office until the election of their successors. *Provided*, That all officers not elected in this manner shall be appointed by the president.

ARTICLE V.

Section 1. The president, or in his absence or inability to serve, the vice-presidents in their order, shall preside at all meetings of the association, call special meetings at the written request of twenty-five members, shall present at each annual meeting a report on the affairs of this association, and perform such other duties as pertain to the office.

Sec. 2. The secretary shall keep a record of all the proceedings of the association. He shall read all communications, conduct all correspondence of the association, at each annual meeting render a report of the duties performed by him since the last annual meeting, and perform such other duties as the association shall direct. He shall notify members of committees of their appointment and election, and furnish each member of the committee with the names of his associates on said committee. He shall receive and collect all moneys for the association, giving receipts for the various amounts, keep a correct account thereof, and pay the same to the treasurer, taking his receipt therefor. He shall give a sufficient bond **within 60 days after his election**, subject to the approval of the president.

Sec. 3. The treasurer shall have charge of all the funds of the association, for which he shall be personally responsible, shall pay all bills when countersigned by the president and secretary, and report the state of the treasury, when called upon by the executive committee. He shall give a sufficient bond **within 60 days after his election**, subject to the approval of the president.

Sec. 4. It shall be the duty of the secretary and treasurer to turn over to their successors, without unnecessary delay, all papers and property of the association committed to their care.

Sec. 5. The executive committee shall have full power to act for, and have general charge of the affairs of the association in the intervals of the sessions of the association, provided that the action of such committee shall not contravene instructions of the association; and its action may at any time be overruled by the association. The committee shall organize by the adoption of rules, and with such officers and committees as it shall deem desirable or necessary. Seven members shall constitute a quorum.

Sec. 6. No member of the executive committee shall be represented by proxy unless the person holding the proxy resides in the same congressional district as the member issuing it, and no member of the State Board of Pharmacy shall be a member of the executive committee or hold the proxy of any member thereof.

ARTICLE VI.

This association may establish for its future government and regulation such by-laws, not in conflict with this constitution, as may be deemed proper and desirable.

ARTICLE VII.

Every proposition to alter or amend this constitution shall be submitted in writing and received at an annual meeting, and may be voted for at the next annual meeting, when, upon receiving the votes of three-fourths of the members present, it shall become a part of this constitution.

BY-LAWS.

ARTICLE I.

Twenty-five members shall constitute a quorum.

ARTICLE II.

Section 1. Every registered pharmacist in the State, of good moral character and professional standing, shall be eligible to membership.

All applications for membership shall be made in writing to the secretary, who shall report such applications to the association at its next meeting, when the applicants may be elected by a two-thirds vote of the members present.

Sec. 2. Every member shall pay annually into the hands of the secretary the sum of one dollar. Any one in arrears at the annual meeting shall not be entitled to vote, or receive the report of the proceedings of the association, and any one neglecting to pay said dues for three consecutive years shall be dropped from the roll of membership.

Sec. 3. The association shall have power to expel a member by a two-thirds vote; but the vote shall not be taken until the next annual meeting after the charges have been preferred, and the accused shall be notified of the charges and specifications made against him.

ARTICLE III.

Section 1. The president shall, within 60 days after each annual meeting, appoint the following committees (of which he shall be an ex-officio member), each to consist of three members, viz.: Committee on matters of trade interests, committee on legislation, and committee on board of pharmacy records.

Sec. 2. The committee on trade interests shall report at each annual meeting such observations and information upon that subject as may seem to them of interest to the association.

Sec. 3. The committee on legislation shall keep a record of, and compile for reference, the enactments of the different states regulating the practice of pharmacy and the sale of medicines. They shall report at each annual meeting of the association what legislation on the subject occurred during the year, and what additional legislation is desirable in this State.

Sec. 4. The committee on board of pharmacy records, created by invitation of the board of pharmacy, shall, at such time as it shall elect, and at least annually, inspect the records, books, and examination papers of the Illinois Board of Pharmacy, and shall annually report their observations to this association, with such suggestions and recommendations as said committee may deem advisable.

PROCEEDINGS OF THE

ARTICLE IV.

The proceedings of the association, the roll of officers, committees and members shall be published annually, under the supervision of the secretary, and a copy of the proceedings sent to each member of the association who is not in arrears for annual dues.

ARTICLE V.

Nominees for the State Board of Pharmacy shall be elected in the following manner: At each annual meeting of the association, twenty-five registered pharmacists of the State, having the qualifications as prescribed by the pharmacy law, shall be elected by the association, and the names of said twenty-five members shall be forwarded by the secretary to all registered pharmacists in the State, with the request that from such members, or others, as the said pharmacists shall severally prefer, five members shall be selected and their names transmitted to the secretary. From the five members receiving the highest number of votes cast in the aggregate, the association shall at its next annual meeting elect at least three members, whose names shall be submitted to the Governor as nominees of the association, as required by the State Pharmacy Act: **Provided**, That if the association does not so select them they shall be selected by the executive committee.

ARTICLE VI.

Nominees for advisory board, department of pharmacy, University of Illinois, shall be elected in the following manner: At each annual meeting of the association, twenty-five registered pharmacists of the State, having the qualifications as prescribed by the pharmacy law, shall be selected by the association, and the names of said twenty-five members shall be forwarded by the secretary to all registered pharmacists in the State, with the request that from such members, or others, as the said pharmacists shall severally prefer, five members shall be selected and their names transmitted to the secretary. From the five members receiving the highest number of votes cast in the aggregate, the association shall, at its next annual meeting, elect at least three members, whose names shall be submitted to the president of the State university as nominees whom the association deems qualified to fill any vacancies which may occur in said advisory board: **Provided**, That if the association does not so select them they shall be selected by the executive committee.

ARTICLE VII.

The order of business, unless otherwise ordered, shall be as follows:

1. Reading the minutes.
2. Applications for membership.
3. President's address.
4. Reports of officers and committees.
5. Unfinished business.
6. New business.
7. Election of officers.
8. Installation of officers elect.
9. Adjournment.

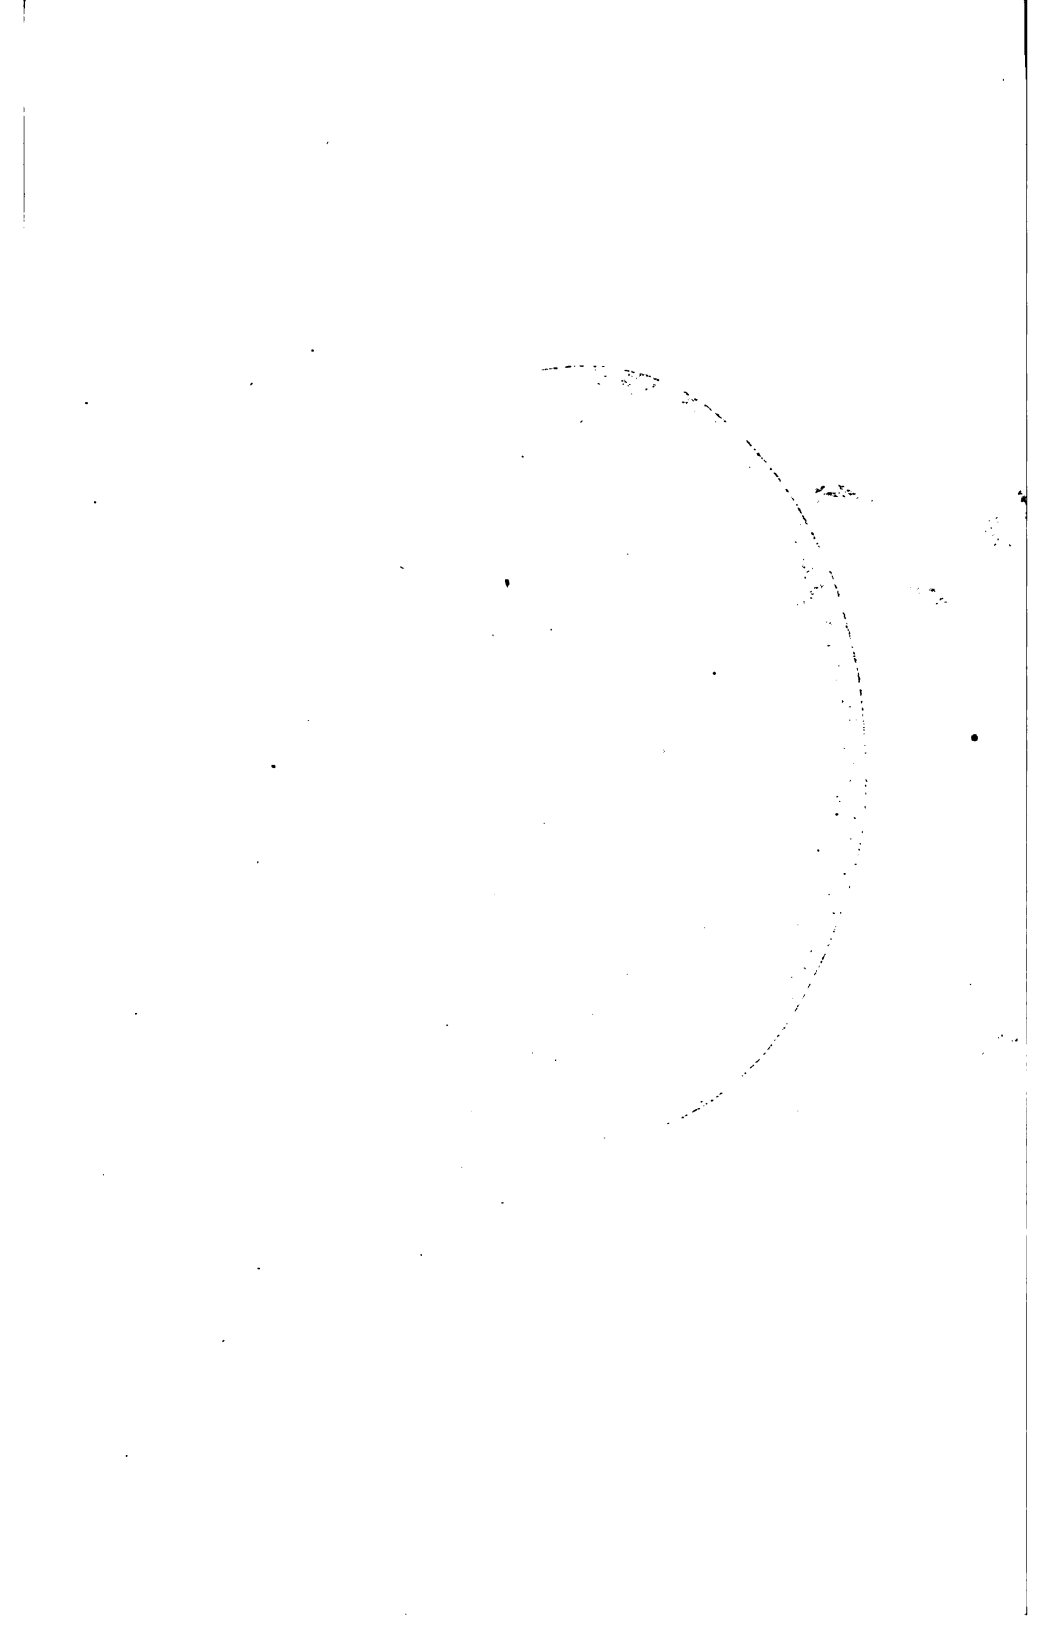

ARTICLE VIII.

Section 1. These by-laws shall not be suspended without the consent of two-thirds of the members present.

Sec. 2. Any amendment to these by-laws must be made in writing, read before the association at one sitting, and laid over to a subsequent sitting, when, upon receiving the votes of two-thirds of the members present, it shall become a part of these by-laws.

CHRIS. GARVER,
PRESIDENT, 1905-6.

PROGRAM.

TWENTY-SEVENTH ANNUAL MEETING.

First Session, Tuesday, June 19th., 2:00 P. M.

Address of Welcome	Hon. A. B. Tolsen, Mayor of Peoria
Response in behalf of the Illinois Pharmaceutical Association	Mr. W. Bodemann
Response in behalf of the Illinois Pharmaceutical Travelers' Association	
.....	Mr. J. M. Schwalbe
President's Address	Mr. Christian Garver
Report of Secretary	Mr. R. N. Dodds
Report of Treasurer	Mr. Geo. C. Bartells
Report of the Local Secretary	Mr. J. E. Huber
Report of Committee to Solicit Membership in the American Pharmaceutical Association	W. B. Day, Chairman
Report of the Committee on Procter Memorial	A. E. Ebert, Chairman

Second Session, Wednesday, June 20th, 9:00 A. M.

Report of Executive Committee	R. N. Dodds, Secretary
Report of Committee on Board of Pharmacy Records	H. F. W. Spilver, Chairman
Report of National Association of Retail Druggists	Thos. V. Wooten, Secretary
Report of the Committee on Legislation	C. H. Avery, Chairman
Report of the Committee on Trade Interests	H. D. Oldham, Chairman
Report of Advisory Committee	Mr. W. K. Forsyth

Third Session, Wednesday, June 20th, 2:00 P. M.

Report of the State Board of Pharmacy	M. C. Metzger, President
Reading of Prize Essays	
Addresses by Visiting Delegates	
Report of Secretary on Vote of Registered Pharmacists for Nominees on State Board of Pharmacy	
Report of Secretary on Vote of Registered Pharmacists for Nominees on Advisory Board, School of Pharmacy, University of Illinois	
Unfinished Business	
Election of Officers	
Adjournment	

PROCEEDINGS OF THE
ILLINOIS PHARMACEUTICAL ASSOCIATION

At its Twenty-Seventh Annual Meeting

Held at Peoria, June 19 to 21, 1906.

The Twenty-Seventh Annual Meeting of the Illinois Pharmaceutical Association was held at Peoria on Tuesday, Wednesday and Thursday, June 19th, 20th and 21st, 1906, with headquarters at the National Hotel. The attendance exceeded three hundred; the weather was delightful and the business sessions were distinguished by the prompt manner in which the important matters which came before the Association were discussed and acted upon. The success of the meeting was insured by the untiring efforts of the Illinois Pharmaceutical Travelers Association, which took charge of the entertainment features in the most praiseworthy and satisfactory manner.

On the closing day of the session, the local druggists showed their interest in the Association by closing their places of business for a half day,—certainly an unusual compliment.

An encouraging feature was the report of the enrollment of an even gross of new members during the year, the total membership now almost reaching the thousand mark, making the largest paid membership in the history of the Association.

FIRST SESSION.

TUESDAY AFTERNOON, JUNE 19, 1906.

The first session was held in the meeting hall of the Elks lodge rooms in the National Hotel and was called to order by President Garver at 3:00 p. m. The President introduced Alderman Gorman who had been delegated by the Mayor to represent him in

welcoming the Association on behalf of the municipality and people of Peoria.

ALDERMAN GORMAN—I am like the high school graduate girl—this comes so suddenly to me that I am embarrassed. Owing to the absence from the city of our honorable Mayor, I received notice to-day about 12 o'clock asking that I would appear before you and extend to you in his stead the welcome of our city.

Some people are orators and you have no doubt discovered by this time that I am not. I regret very much the disappointment it is to you not to have the pleasure of listening to an address of welcome from our honorable Mayor. He is an orator and could say things of more interest to you than I can.

Great men have sometimes said that they were afraid they might be misquoted. In order that I may not be misquoted I am like the school boy delivering his first recitation. I am putting it down on paper. We haven't the music set to it or I would sing it, but I will now say the little I have to say. (Applause).

I am here to address you, but, unfortunately, while desiring to say something, I am at a loss for something to say. I am like the man's parrot, which he found a purchaser for. The purchaser, after he had given the bird a fair trial, wished to return it and get his money back, because it couldn't talk. Its former owner refused to take the parrot again and give back the price, saying he didn't sell him for a speaker, but for a listener.

That is just the sort of a bird I am. I know little of the drug business. I have often worn patches, but never plasters. I never ate pills, don't think I'd like them. I prefer peanuts.

I have, however, patronized drug stores, and I have found a drug store a good place to get refreshments; hence, to be frank with you, I like druggists.

I am glad that a large and intelligent body of Illinois druggists are here in convention. I welcome you to our city, and hope you will have a pleasant and profitable time, in fact so pleasant that you will often in the future visit our city. We hope, that after your business deliberations are over, you will remain long enough to see our attractive places, and make the acquaintance of our citizens.

To the commercial travellers, who represent the wholesale drug business, much credit is due, for bringing you together in convention, and directing your thoughts to our city, as your place of meeting.

Knowing the representatives of your calling in Peoria, as well as I do, I can safely say, that nothing will be left undone to give you a good time; and if, in having a good time, any over-officious "Cop" shall interfere

with you, tell him that you are in Peoria as the guest of Billie Ohl, a druggist throughout, and a Police and Fire Commissioner, through whose goodness, he wears his star, and I promise you he will apologize and pass you by.

Again, gentlemen, Peoria gives you greeting, and wishes you the greatest pleasure. (Applause.)

President Garver then called upon Mr. Wilhelm Bodemann, of Chicago, to respond for the I. P. A.

MR. BODEMANN—Mr. Alderman, you have been so generous with your bouquets that I thought I would bring you a real one. (Presents bouquet.)

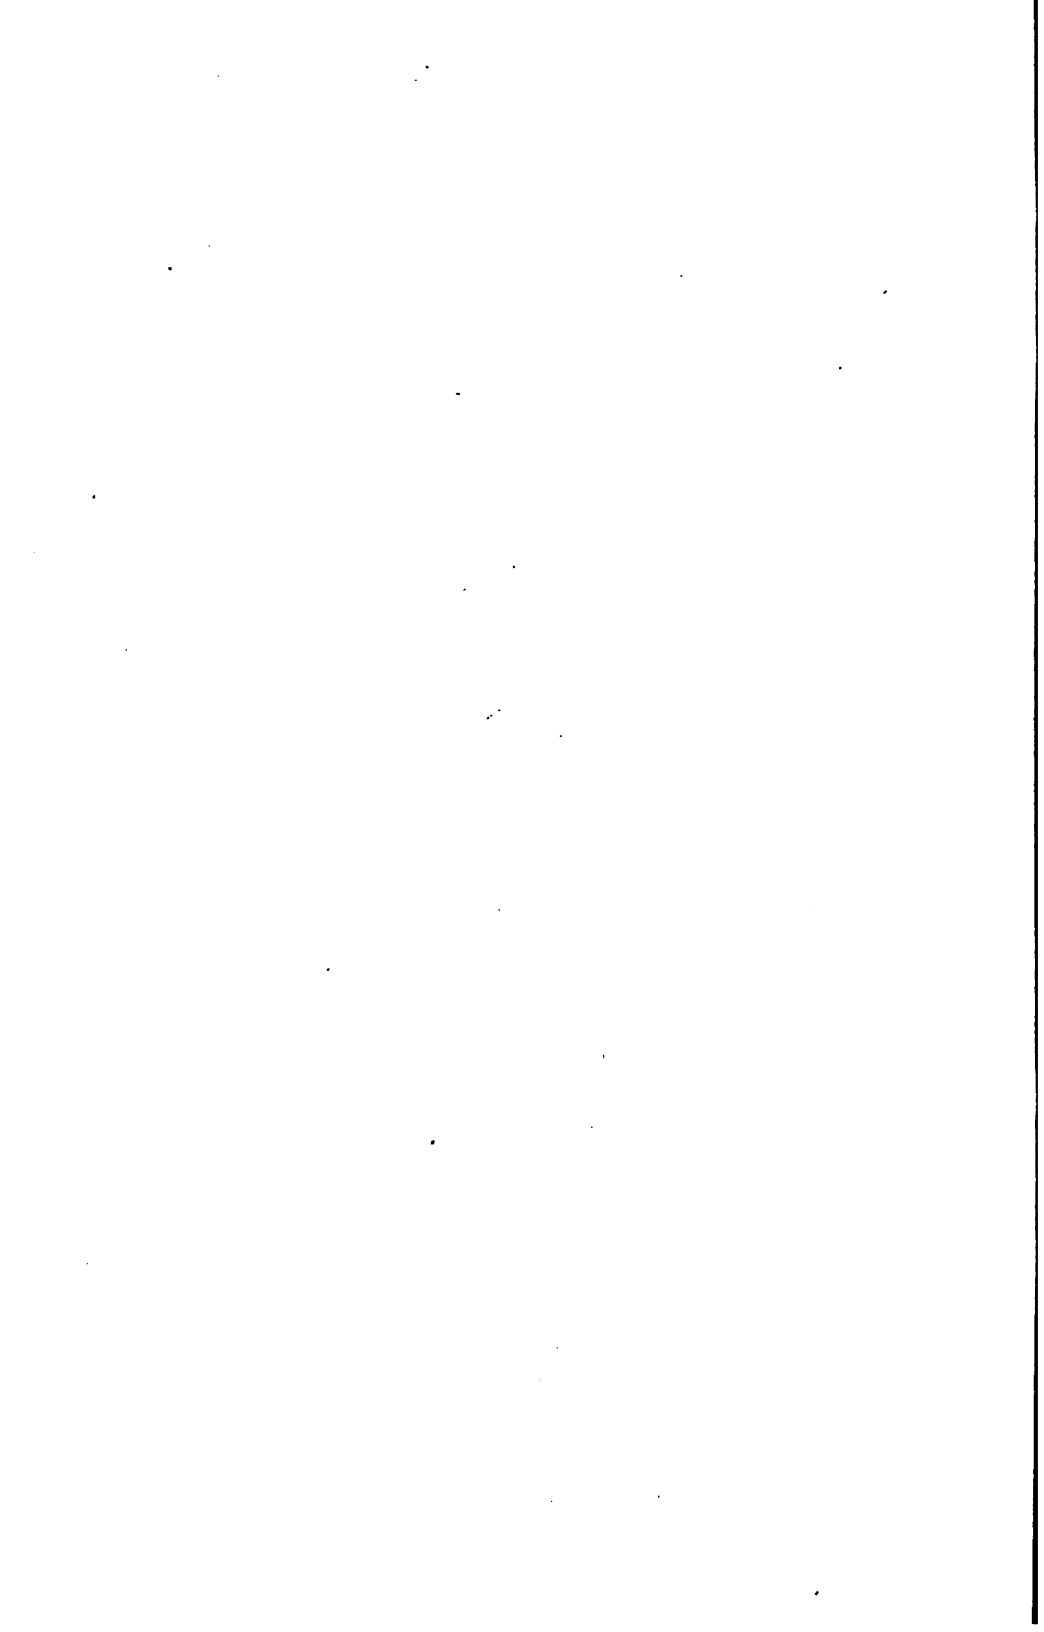

You have said that great men are often misquoted. Now in order that I, too, might not be misquoted, I also put my little story down in writing.

Had it not been for the fact that President Garver notified me at least ten days ago, I would have commenced with the old saying, "Unprepared as I am." But that is a chestnut and I do not like chestnuts.

I shall also reverse a traditional order of procedure by congratulating you that you had the privilege of welcoming so select a bunch of splendid men and women as we of the Illinois Pharmaceutical Association are. You will not find our superiors anywhere. One of our leaders, I believe Fritz is his name, is one of your home products; another one is Bent-on a direct pedigree from the great western Senator Benton; Bloomington sends a Garver, a most skillful carver of pharmaceutical destiny; Carlinville sends a Steinmeyer, who always improves the looks of a stein by his skillful manipulation; Girard, a Deck—always on deck; Springfield a Dodds and when you come to pack up these duds look out for a big enough trunk. Cairo sends a Schuh—that makes shoo-fly lively; Chicago, the windy city, sends a Gale and when he gets busy look out for your anchor and moorings. Chicago has also a good assortment: A-very—a very tower of strength in association work; Larsen—entirely innocent of larceny in spite of his name; Quales—to me his name suggests the delicate flavor of quails on toast, fried in Norwegian cod liver oil; a Chantler whose chants are gems of eloquence and logic; also a Fry who cannot be jumped from the frying pan. Joliet has a Brown, who does it up brown, and a Mount, a-mount-ing to a good deal. I regret that the time is too limited to trot them all out here and introduce you to the whole outfit. Nobody knows whether you will have another chance to see them all together in Peoria. Time travels swiftly—and Father Time has worked havoc among our great men lately. He seems to have it in for the good and the great: Bismarck and Grant, Lincoln and Washington, Gladstone and Caesar, Napoleon and Hannibal—all these illustrious lights have gone out—and as for me, I don't feel any too well myself.

W. B. DAY,
SECRETARY.

On the other hand, Peoria is the home of many distinguished men: the Rev. Mr. Morrow, Robt. Ingersoll, J. B. Greenhut, G. B. Raum, etc. You have a world-renowned financier and educator, who to my regret has a pressing engagement at Joliet just now, so he cannot be here to show us how not to get rich quick. Peoria has made Clark's Rye famous, or rather Clark's Rye has made Peoria famous, and I am informed that this city has the best Mayor that ever ornamented any city in this country. I have seen it stated that your city has a splendid supply of water and that on this water the merits of Clark's Rye are based. According to Monday's Record-Herald you have the Buckeye gunpowder factory in your peaceful city, and an explosion in this establishment was felt in the United States Senate—Mr. Dupont didn't have to come and see the explosion, he felt it all right. The Buckeye people seem to buck against the gunpowder graft in the Senate pretty lively and I wish them the good luck to land the contract. Peoria's future is an unlimited possibility, by the time Congress passes the N. A. R. D. Mann Bill and the Transcontinental Ship Canal Bill, and no matter from what city or village we hail, we all hope and wish that all the good things that are coming to your beautiful city will be realized in the near future. On behalf of my fellow members, I thank you most heartily for your cordial welcome. Most of us are not familiar with great cities and if some of the natives should wander around your great city amazed and bewildered when the electric current is on, let us have the guiding and protecting shield of your high office and give the lost wanderer a chance to pick himself up again. Again I thank you. (Applause.)

PRESIDENT GARVER—President C. C. Lake of the Illinois Pharmaceutical Travelers' Association has delegated Mr. J. M. Schwalbe to respond to the address of welcome on behalf of the Travelers.

MR. SCHWALBE:

Mr. President, and Members of the Illinois Pharmaceutical Association:

I deem it an especial honor to be called before you to respond for the Travelers. Though, after listening to the speeches of those who preceded me, I feel that my effort will look small. However, seeing all these friendly faces about me, I shall take courage, and endeavor to do my subject justice.

The Traveler—a nomad; here to-day there to-morrow; his home wherever he hangs his hat. Always on the go, looking only to do the right thing by his customer. He brings the manufacturer, wholesaler and jobber to your door, and is the advance agent of Commercialism. He is not only your "Time and Money Saver," but also your news purveyor. He is a walking encyclopedia of current events, and what he don't know, he'll make a rough guess at, and hit it four out of five times. Ask him the state of

the drug market, and he will quote correctly the rise and fall of prices in drugs; ask him the news of the world at large, and he'll tell you all about it. He is always cheerful, and ready to take your orders, socially and commercially. Give him a kind word, a courteous greeting and he's your friend forever.

Since the organization of our Association, it has been our aim to make these conventions most successful. You know what has been done at Bloomington, Rockford and Chicago. The travelers will use every effort, shun no labor, devote their time and energy to make your stay at these gatherings pleasant and enjoyable, and all the remuneration they ask is your appreciation. Tell them you have enjoyed yourself, and they will be amply repaid; and as the time rolls around for another convention, the travelers stand ready to redouble their efforts to give you pleasure and enjoyment.

Let us join hands and look forward to our coming conventions with pride and pleasure, and with that spirit make them the best and grandest conventions of any state in the Union.

I congratulate the Illionis Pharmaceutical Association on its growth and prosperity and bespeak for it the first position among the State Associations.

President Garver then called Vice-President Porter to the chair, while he delivered the following address:

PRESIDENT'S ADDRESS.

I am very glad to have this opportunity to bring to your attention the work the Illinois Pharmaceutical Association is doing along various lines of reform and to ask your hearty and speedy co-operation.

LEGISLATION.

The most important subject to be considered is that of anti-narcotic legislation. The Committee on Legislation has prepared a draft of a bill for the regulation of the sale of narcotics or habit-producing drugs, which you have all had the privilege of examining and soon will have the privilege of discussing. I hope that all the druggists here will have something to say at that time, for the indiscriminate traffic in narcotics is one of the greatest evils of the drug trade, and the most stringent measures should be taken to abolish it. The public is becoming aroused on this subject and will undoubtedly take some action to have an anti-narcotic law passed by the Legislature unless we do something immediately. And if the general public should have the opportunity to frame the pharmacy laws, greater harm than good would result to the druggist, owing to the natural ignorance of the laity regarding the conditions in the drug trade. Narcotic legislation is necessary not only for the protection of the public, but

also to uphold the character of our profession. We do not want total prohibition of narcotic drugs for they are very necessary to the welfare of humanity, but such prohibition as will prevent habitual users from obtaining them. In this city of Peoria, I am informed, the Council has passed an ordinance prohibiting the sale of certain narcotics except under stringent regulations. As a consequence the use of habit-producing drugs has greatly decreased. If such a law has proved a success in a city, why not in a State?

I do not think there is any question now with the most of us that annual renewal fees are necessary for the maintenance of the Board of Pharmacy and for our own protection. The question now is, what shall be the penalty for the druggist who is lax about having his certificate renewed? The committee has made three suggestions, and from those we ought to find one that will solve the question.

As to "Time Service," I recommend that that section of the law be stricken out entirely. I do not think it fair to the registered pharmacist who has spent a good deal of time in careful study, that the privileges he enjoys be given to other men who have simply served a certain number of years in a drug store. Moreover, I think all applicants for registered pharmacist should be given the same examination.

Would it not be well for us also to take some action to regulate by law the sale of proprietary medicines containing alcohol? Such compounds should not contain any more alcohol than necessary to extract the active principles of the drugs or to keep them from freezing or fermenting. All proprietary medicines containing more alcohol should be considered as intoxicating liquors and sold as such.

THE DISPENSING PHYSICIAN.

The following resolution was offered and adopted at our last convention:

"Resolved, That we favor such legislation as shall require the proper health officer, in case of death ensuing from disease or otherwise under medical attendance, when the physician in charge has himself dispensed his own medicines, shall issue the death certificate instead of the attending physician, as now permitted by law."

No physician should be allowed to diagnose a case, determine the remedy, dispense the medicine and write the death certificate. Such power places too much responsibility over life and death in the hands of one man. Human life is too valuable to be sacrificed heedlessly. No physician can have the knowledge of drugs the registered man has acquired, who has devoted all his time to that study, and in all cases either a capable, educated pharmacist should stand between the physician and his patient or the health officer should sign the death certificate. If the physician is to be

allowed to dispense his own medicines then he should be required by law to make a thorough study of the physical properties of all dangerous drugs and to pass an examination similar to the one now required for a registered pharmacist.

PREREQUISITE LEGISLATION.

It is the tendency of the present time to raise the educational standard in all professions and the question now arises, shall the druggist follow this lead? There is no doubt that higher education broadens a man and increases his ability in all directions. The only way the standard of requirements could be increased would be by action of the Board of Pharmacy, backed by a change in the pharmacy laws to that effect. If the supply of apprentices, assistant pharmacists and registered pharmacists equaled the demand, then I would urge the druggist to take steps to have the law changed. The majority of us would prefer our apprentices and clerks to have at least one year high school training or its equivalent or more if possible, but such advancement in requirements will have to come gradually with the betterment of trade conditions and increase in profits.

N. A. R. D.

The spirit of fraternity manifested in all the dealings of the N. A. R. D. was never shown more clearly than in their promptness in starting a subscription to relieve the suffering of the San Francisco druggists. When the news of that terrible disaster reached the public, an appeal was immediately sent to all the local associations asking for concerted action to raise a sum of not less than \$100,000 for the aid of the druggist victims of the California disaster. Quick response was made and contributions were sent in from many factories, jobbers, associations, and individuals; all doing their share in this N. A. R. D. undertaking. This incident is only one application of their motto "To live and let live."

Concerted action, not individual, is necessary to cope successfully with trade wrongs. All pharmaceutical associations confer some benefits on their respective communities, and the wider the field of action, the greater the results. The local associations better local conditions; state associations have still more influence, while the advantages to be derived from a national association, supported by the active co-operation of all the druggists in the country, are inestimable. At present the N. A. R. D. is passing through a crisis in its affairs and needs the intelligent backing, hearty support and financial aid of all retail druggists.

A. PH. A.

While we are interested in adjusting trade conditions we must not forget the scientific side of our profession. The American Pharmaceutical Association is doing effective work in that cause with its small member-

ship, and that it has accomplished so much plainly indicates what a great factor for good it might become if it had the membership that should be a perquisite of such an organization. The establishment of auxiliary branches in the larger cities will do much to increase the scope of influence and will gradually bring more druggists in touch with the Association. Dr. Whelpley has suggested that we offer one year's dues to the A. Ph. A., as a prize for some meritorious paper, and I recommend that we accept his suggestion. We are steadily working toward the future, but we must not forget the man who laid the foundation of our profession in this country. If there are any of you who have not already subscribed to the William Procter, Jr., Memorial Fund, I hope you will do so at your earliest opportunity.

I. PH. A.

Before I close I want to talk to you for a few moments about our own association. We are in a prosperous condition, the increase in our membership has been greater in the past year than heretofore, but when we are prospering is the time for each and all of us to strive with new enthusiasm and zeal to uplift our association and to increase its faculties. This we can only do by united effort to further increase the membership and by active participation in the work of the association. There are about 4,500 druggists in the state eligible for membership and of that number only about 740 have joined us. Our membership ought to be twice as large and that is not asking much. Let each member pledge himself to bring in one new member before our next annual meeting and let each president of the various local associations swing his association into line. I would further recommend that my successor appoint a committee, one member from each congressional district, to solicit membership in the Illinois Pharmaceutical Association.

I wish to take this opportunity to express my appreciation of the honor conferred upon me when you selected me for your president and to tender my hearty thanks to all the members of the Illinois Pharmaceutical Association, and the Illinois Pharmaceutical Travelers' Association for their loyal support during the past year. Our brother association has contributed much to the success of our conventions, upon them has lain the task of furnishing our entertainment and we are all here to testify to their tireless efforts in our behalf. We are striving toward the same goal though along different lines and the happy results of our co-operation augur well for the future. We owe them our sincerest thanks. When I look over the program furnished us and call to mind the well known hospitality of this beautiful city of Peoria, I feel safe in prophesying that our present convention will be the most profitable and enjoyable one we have ever held. (Applause.)

Upon motion of Mr. John Stuchlik, the President's annual address was referred to a committee of three, consisting of Messrs. John Stuchlik, W. O. Steinmeyer and George M. Bennett.

PRESIDENT GARVER (in the chair)—We will now hear the report of Secretary R. N. Dodds.

REPORT OF SECRETARY.

To the Members of the Illinois Pharmaceutical Association:

I have the honor to submit herewith my report as Secretary from July 1, 1905, up to and including June 12, 1906. I am pleased to be able to again report a surplus for the year's business.

Interest in the association was never so marked as it has been during the past year. Applications for membership have been received from sections in which heretofore very little, if any, interest was manifest. The most gratifying feature of our new membership is that it includes an unusually large number of registered pharmacists who have but recently passed the examinations of the State Board of Pharmacy. This means that new blood is being injected into our association which will be followed by new ideas and renewed activity.

For these new members the association is indebted in a very large measure to President Garver. He has sent out hundreds of letters to registered pharmacists of long standing and to those who passed the examinations of the Board of Pharmacy, inviting and urging them to join our ranks, and has left no stone unturned to further the interests of the association. That his labors have not been in vain is evidenced by the amount of dues collected since our last meeting.

In this connection I want also to thank the Illinois Pharmaceutical Travelers' Association for what it has done and is doing to stimulate interest in our association and membership.

The amount of dues collected during the year was \$867.00, an increase over the amount collected last year of practically 19 per cent.

VOTING CARDS.

In my report last year I called attention to the lack of interest in the voting cards. The number of votes recorded during the past year shows an increase of about 20 per cent over the previous year, but with this increase, encouraging though it is, the number is still far short of what it should be. Every registered pharmacist in good standing is entitled to vote upon the proposition submitted on the cards, regardless of membership in this association. About one in every four availed himself of this opportunity the last year. The year previous, about one in every five voted, and the year previous to that, about one in six. You will observe

that there is a gradually increased interest being taken in this matter. It would be a great source of satisfaction if at our meeting next year the officers of the association might be able to report that one-third of the registered pharmacists had sent in their voting cards.

MEMBERSHIP.

Our records show that 740 members have paid their dues for 1906 and are therefore in good standing. This is a net increase since my last report of 77 and a net increase in the last two years of 119.

Our records further show that 100 owe dues for 1906; that 68 owe for 1905 and 1906; and that 69 owe for 1904, 1905 and 1906. The number who have not paid since 1902 is 57. Their names will be stricken from the rolls at the close of this meeting.

Deaths of members of which your Secretary has been advised since our last meeting are three in number. They are Frank Kallwach, Chicago; George C. Scheidig, Chicago; and F. O. Segrund, Rockford.

NEW MEMBERS.

Since the date of my last report, 144 applications for membership have been received and favorably acted upon. They are:—

Anderson, James A., Chicago.	Cunningham, Elmer S., Champaign.
Anderson, C. J., Jamestown, N. D.	Cutler, Earl W., Abington.
Anderson, H. M., Monmouth.	Day, E. I., Clinton.
Armstrong, Archie W., Dwight.	Denson, John T., Minonk.
Armstrong, John J., Arcola.	Demes, Chas. A., Chicago.
Arndt, Herman G., Chicago.	Drallmeier, Geo. W., Quincy.
Ashbury, John W., Cleveland, O.	Duerselen, H. H., Chicago.
Bayes, George M., Chicago.	Dyna, Carl, Bloomington.
Bornhoeft, John E. H., Chicago.	Eichenberger, W. S., Peoria.
Bodenschatz, John, Lemont.	Eicher, L., Chicago.
Bonnett, J. L., Bloomington.	Engels, N. R., Chicago.
Brinkman, H. A., Warsaw.	Feltham, J. H., Springfield.
Bruder, Otto E., Chicago.	Fernholz, Ed. N., Harvard.
Brown, Garrison, Crescent City.	Fithian, Geo. R., Newton.
Braun, Wm. A., Chicago.	Farrar, Samuel M., Chicago.
Bundy, W. H., Marion.	Foreman, E., Cobden.
Burgess, W. J., Johnston City.	Germer, F. J., Chicago.
Burmeister, H. J., Morris.	Gille, W. S., Barry.
Calder, Alexander, Chicago.	Glazebrook, M. D., Kenney.
Carley, Chas. E., Quincy.	Harris, Geo. H., Chicago.
Carson, J. A., Mahomet.	Hatscheck, E. L., Chicago.
Clinkenbeard, G. W., Champaign.	Harder, C. H., Pittsfield.
Coffey, P. F., Chicago.	Hattenhauer, W. B., Streator.

Respectfully submitted,

R. N. DODDS, *Secretary.*

PRESIDENT GARVER: We will now listen to the report of Treasurer Bartells.

REPORT OF THE TREASURER.

To the President and Members of the Illinois Pharmaceutical Association:

Brethren: Another year has passed as "swiftly as a weaver's shuttle," and again we are called on to note our bearings and take account of stock; to see where we stand and what we are worth financially as an association. As treasurer I am able to say we are solvent. While there has not been a large increase in our surplus, we have paid all obligations and have a small surplus. The receipts for the year were \$1,013.28. The expenditures were \$936.00, leaving a surplus of \$77.28 to add to our former balance. This is very gratifying under the circumstances of the short eleven months year and other matters. I submit for your consideration herewith an itemized statement of receipts and expenditures with vouchers, bills and receipts for same.

1905

Dr.

George C. Bartells, Treasurer, in account with the Illinois Pharmaceutical Association.

Respectfully submitted,

GEORGE C. BARTELLS, *Treasurer.*

Upon motion of Mr. T. V. Wooten, the reports of the Secretary and Treasurer were referred to a committee of three for audit and report. The Chair appointed on this committee Messrs. T. V. Wooten, W. K. Forsyth and Paul G. Schuh.

MR. BODEMANN—Mr. Chairman, I have a license to practice at the bar—I mean the legal bar—may I have your permission to cross-examine the witness?

PRESIDENT GARVER—You have the permission of the Association.

MR. BODEMANN—I see that our treasurer has been guilty of malpractice in turning into the treasury the interest he has collected on the funds belonging to the association. I would like to ask the witness (Mr. Bartells) how long he has been treasurer of this association?

MR. BARTELLS—I have been treasurer for eight years.

MR. BODEMANN—With the admission of the witness of such guilty practices as turning in interest on association funds—with this admission before us—I move you, Mr. President, that the dues which Treasurer Bartells has paid during the eight years he has acted as our treasurer be refunded to him, and that hereafter he be exempt from any dues whatsoever.

The motion was carried without a dissenting voice.

MR. T. C. LOEHR—At former meetings of the Association much time has been used in the consideration of various resolutions. I move you, Mr. President, that the chair appoint a committee of three to which all resolutions be referred.

Motion was carried and chair appointed T. C. Loehr of Carlinville, H. F. W. Spilver of Chicago, and Harry D. Oldham of Urbana.

PRESIDENT GARVER—The report of the local secretary is the next number on our program. We will now hear from Mr. J. E. Huber. I understand he has something to tell us in the way of entertainment that has been provided for visitors at this meeting.

MR. HUBER—I have no formal report to make to you as practically all of the work has been done by the local representatives of the travelers. Mr. Lueder, Mr. McDougal and the other druggists in Peoria have all shown a willingness to aid in the preparations for your visit, but there has been but very little work for us to do. I want to say right now for the information of any future local secretaries that the position is a "snap."

About all we have to do is to receive the goods that have been shipped here by the generous wholesalers and jobbers interested in the welfare of the retail druggists, and store them away until such time as the travelers could take charge of them.

Before I take my seat I want to say a little about the entertainment features that have been provided.

This afternoon the ladies will be given a carriage ride over the city. To-night a reception will be tendered President Garver, to be followed by an informal dance in the dining room of this hotel. Arrangements have been made for everybody and we want everybody to come.

To-morrow afternoon the visiting ladies are invited to take a ride on the river. Ample accommodations have been provided for all.

To-morrow night a complimentary band concert will be tendered by Post E, of the Travelers' Protective Association to all visitors at Glen Oak Park. On Thursday morning everybody is invited to visit Clarke's distillery and see how liquors are made. We hope, after you have visited this institution, that you will change your minds about such things. In this connection I would like to say that Peoria district pays annually as taxes to the U. S. Government \$40,000,000, which is about 1-16 of the entire running expenses of the U. S. Government.

MR. BARTELLS—I would like to make a motion in regard to prize essays. I move you, Mr. President, that all prize essays be referred to a committee of three to be reported upon at a future session.

MR. STUCHLIK—I would like to amend the motion of the gentleman to the effect that all of the prize essays presented be printed in our proceedings if the authors so desire, but that only those receiving prizes be read to the Association.

The motion as amended was carried and the chair appointed as a committee on prize essays: Prof. W. B. Day of Chicago, W. F. Jungkunz of Freeport, and W. D. Duncan of Ottawa.

PRESIDENT GARVER—All prize essays should be handed to the secretary immediately upon adjournment of this session. They will be referred to the committee just appointed and will be reported upon at a later session.

Mr. McDonald, of the Chicago Telephone Company, whom all of you know or ought to know in connection with telephone matters in Chicago, wants to make an announcement. If there are no objections, and the chair hears none, we will now listen to what Mr. McDonald has to say.

MR. McDONALD—It is a pleasure to me to announce to you that this is the first year I have succeeded in having the courtesy of long distance service extended to the members of the Association. For the next three days, in room 250 on the parlor floor of this hotel, between the hours of 5 P. M. and 9 A. M., this opportunity will be given you. I hope you will all take advantage of it. This courtesy is extended to us by the Central

Union Telephone Co. The service is absolutely free. It has been placed at our disposal with the hope that it will be used. (Applause.)

MR. LARSON—I move you Mr. President, that a vote of thanks be tendered the Central Union Telephone Company for its very great courtesy.

Motion was unanimously adopted by a rousing vote of ayes.

MR. WM. K. FORSYTH—I would like to offer the following resolution in regard to the U. S. Pharmacal Co..

PRESIDENT GARVER—The gentleman will please read the resolution for the information of those present and it will then be referred to the committee on resolutions for its recommendation.

(See text of resolution in report of committee on resolutions.)

MR. SOREN MATHISON—I would like to offer a resolution at this time.

PRESIDENT GARVER—Very well, you may read it and it will take the same course as was ordered in the previous resolution offered.

(See text of the resolution in the report of the committee on resolutions.)

PRESIDENT GARVER—I understand that Mr. Bodemann has a paper on Social Hygiene. I suppose this is an opportune time to listen to this paper and I will ask Mr. Bodemann to present it.

SOCIAL HYGIENE.

MR. CHAIRMAN: With your permission I wish to call the attention of the I. Ph. A. to the organization of a national association, which under various names has started branches in different cities. Such a branch was started in Chicago under the name of the Society for Social Hygiene. The main purpose of this society is to spread education and information regarding venereal diseases. In order to show you the relation this topic has to Pharmacy, I beg to read you two editorials in recent issues of the Bulletin of Pharmacy (see Bulletin of Pharmacy, February and May, 1906.) When the Chicago or Illinois branch of this association is in fairly good working order I know of no calling excepting only the medical profession that has an opportunity to aid in this good and important work so efficiently as pharmacists. The most interested party, the young man in trouble, comes to us. It is our province to guide him right, and by no means should any pharmacist be guilty of quackery in undertaking to treat these various disorders. To do this after full knowledge of the grave and serious sequels to the young man, and to his prospective posterity, is nothing more nor less than a crime against humanity and a crime against pharmacy, and a stain upon the man who willfully, for the sake of filthy lucre, traffics in untold misery and agony. Later on this society will undoubtedly be in shape to help legislate against this arch enemy, and the pharmacist should be at his post and help in the work of framing such laws and aid in placing the booklets of information pub-

lished by this society where they do the most good. I move you that it be the consensus of opinion of this convention that Illinois pharmacists should do all they possibly can to aid this noble and humane society, and that we condemn in most emphatic terms the sale of patent medicines, offered for the alleged treatment of such diseases, no matter how large the margin of profit those remedies may offer, no matter how large the donations which makers of these quack nostrums may make for charitable purposes. The most genuinely charitable thing we pharmacists can and should do, is to dump these quack nostrums out on the dung hill where they belong. No pharmacist worthy of his calling should be willing to bring down untold misery and death on posterity by either treating these disorders nor by selling alleged cures for the same.

If any disease calls for the best, most skillful and conscientious medical treatment, this disease does. Mr. President, I move you that we declare our earnest support of the social hygiene movement and that our secretary be directed to so inform the secretary of that society, Mr. W. W. Hallan, 1610 Unity Building, Chicago. In cities where this society establishes branches, the pharmacists should be a factor in this initiative movement, and look to it that the work is conducted on radical, but rational lines, adopting sane but thorough methods solely for the purpose of doing the most good to the greatest number.

W. BODEMANN.

PRESIDENT GARVER—Are there any remarks upon this motion?

MR. BARTELLS—I want to second the motion heartily. This question has been a source of great annoyance to me in my 40 years' experience as a druggist. In country villages there is perhaps less of this than in cities. When a boy gets in this condition he will go from his own town to a neighboring town for medicine. He will not give his true name as he doesn't want anybody he has any respect for to know his condition. It is a very delicate matter, and I am glad it has been brought to our attention. We will have to go at it in a quiet, intelligent manner in order to be of any service in this movement. Some action is certainly necessary for the welfare of the country.

MR. WOOTEN—Mr. Bodemann has asked me, if, in my opinion, this action is satisfactory. It occurs to me that it is rather indefinite. I believe that in view of the urgent necessity of bringing to the attention of the public the seriousness of the situation with reference to venereal diseases, their proper treatment and prevention, that we ought to go somewhat further than to declare our sympathy with the movement. It occurs to me that we ought to break down, as far as we can without taking radical action, the false modesty which prevents our talking about these diseases in such a way as to prevent the growth of them. I believe with Mr. Bartells that the treatment of these diseases is regarded too lightly. It is not uncommon

for apprentices and those who know very little about medicine to recommend certain things for the treatment of gonorrhea. They do it in such a careless manner that would be laughable if it were not so serious. If I were going to offer a resolution it would be that we secure from this society information as to how we can be most useful in advancing the work. I would go further than a mere expression of our sympathy.

MR. BODEMANN—If Mr. Hallan is notified of the adoption of my motion he will be so glad that he will furnish you with plenty of literature upon the subject.

Mr. Bodeman's motion was then put and carried.

PRESIDENT GARVER—If Prof. Day is ready we will now listen to the report of the committee to solicit membership in the American Pharmaceutical Association.

REPORT OF THE COMMITTEE TO SOLICIT MEMBERSHIP IN THE AMERICAN PHARMACEUTICAL ASSOCIATION.

To the President and Members of the Illinois Pharmaceutical Association:

I believe that our committee is the first committee of its kind appointed by this Association. If so, its appointment was made at a singularly fortunate time for there is at present a great awakening of interest in the American Pharmaceutical Association among druggists throughout the country.

As no doubt you are already aware, a monthly bulletin has been started. Local branches, an innovation in our parent association but of long-recognized value in general scientific societies, have been organized in Chicago, Philadelphia, Baltimore, Minneapolis and Washington, and will be organized in the other large cities.

New members are coming in rapidly. The membership as given in the recently issued proceedings, totals 1,800, and is by this time nearly 2,000.

In this movement, Illinois has not lagged behind. The first local branch was organized in Chicago, in January of the present year, and has held six monthly meetings, well attended, interesting and apparently fruitful in results. Sixty-two new members have been received, thus doubling the membership in Chicago and placing that city in the first rank—probably in first place—as regards its membership. The membership in the state as a whole has increased 75 per cent, and Illinois now stands third in membership instead of fifth as formerly.

While your committee takes no special credit for this encouraging condition of affairs; such credit being rather due to the officers of the Chicago branch and to the editor of the Bulletin, yet the successful efforts of your former president, Mr. Herman Fry, are deserving of especial mention, Mr. Fry having taken a most active interest in the formation of the Chi-

cago branch, and having brought in ten new members through his personal solicitation.

Respectfully submitted,

W. B. DAY, *Chairman.*

On motion, the report of the committee was adopted and ordered printed in the proceedings.

PRESIDENT GARVER—I understand that Prof. Day has been requested by Mr. Ebert to submit the report of the committee on the Procter Memorial. We will now have this report.

REPORT OF THE COMMITTEE ON THE PROCTER MEMORIAL.

To the Illinois Pharmaceutical Association:

The committee on Procter Memorial appointed at the last annual meeting begs to make the following report:

The Committee on Procter Memorial of the American Pharmaceutical Association published an address in the May Bulletin of the American Pharmaceutical Association, explaining the object and purpose of this movement. This address has been printed in the form of a booklet and has been distributed at the meeting of every state pharmaceutical association held this year, and where committees were not already formed, such have been appointed for the purpose of carrying on the work in every state and territory.

The address describes the history of the movement inaugurated at the semi-centennial of the American Pharmaceutical Association, in Philadelphia, in 1902, gives a biographical sketch of the late William Procter, Jr., and the reasons why every pharmacist should do his share in honoring the memory of Procter, "Father of American Pharmacy."

Since the National Committee is now actively at work, it is desired that the Committee of this Association solicit subscriptions to the fund at once, the same to be turned over to the treasury of the American Pharmaceutical Association.

The erection of the monument is practically assured, and it only remains for the pharmacists of the country to identify themselves with the movement by making such contribution to the subscription fund as they may desire.

Respectfully submitted.

Chicago, June 18, 1906.

A. E. EBERT.

PROF. DAY (continuing)—I might say in addition that the life membership fund of the A. Ph. A., amounting to \$15,000, will be devoted to the purpose of erecting this monument. The fund is not sufficient, however, and it was felt to be very desirable that the pharmacists of this country should each contribute a small amount toward this memorial so that it might stand as a contribution from the pharmacists of the United States. It is not necessary that large amounts be subscribed. Mr. Ebert has made

the suggestion that contributions of one dollar will be large enough. He has sent some subscription forms and has asked that permission be given to the Secretary of the association to receive subscriptions and turn them over not later than the first of August. I have some blanks here which I will leave with the Secretary, and with your permission, I will distribute the booklets.

The report of the committee was adopted without debate.

At 5 o'clock the meeting adjourned to meet the following morning at 10 o'clock.

SECOND SESSION.

The Association reconvened on Wednesday morning at ten o'clock with President Garver in the chair.

PRESIDENT GARVER—The first thing in order this morning is the report of the committee on Board of Pharmacy records, of which Mr. H. F. W. Spilver is chairman.

REPORT OF COMMITTEE ON BOARD OF PHARMACY RECORDS.

To the President and Members of the Illinois Pharmaceutical Association:

Your Committee on Board of Pharmacy records begs leave to submit the following report:

Your Committee found the affairs of the Board of Pharmacy in an A No. 1 condition.

The system and order that prevails in the office at Springfield reflects but credit on the Secretary and officers of the Board. We have noticed the expediency and promptness with which applications are received and all correspondence is personally attended to by the Secretary; that proves a source of satisfaction to everyone who has any dealings with the Board. The filing of all applications and the subsequent records of the applicants whether successful or not, also the records of renewals of all registered men, is next to perfection; so that any name and all records belonging thereto can be looked up at a moment's notice.

Although we are reminded that the Board of Pharmacy is about the only office left at our capital, that is supported by fees alone, yet from our observation and investigation we are confident in saying that the office of the State Board of Pharmacy is ready to have the searchlight turned on at any time, and the light can reveal nothing but honesty and justice.

The books and accounts for the year 1905 were examined by Wilkinson, Reckitt, Williams & Co., certified public accountants. We quote from their report as follows:

To the State Board of Pharmacy, Springfield, Ill.

GENTLEMEN: In accordance with your instructions we have made an examination of the books of account and other records of the Secretary

and Treasurer of your board for the year ending December 31, 1905, and have pleasure in reporting that we found same to be in good order. All monies received were duly accounted for and satisfactory vouchers were on file for all disbursements made.

We submit herewith a correct statement of the Cash Receipts and Disbursements for the year ending December 31, 1905.

As in previous years the report of the Chairman of your Committee on Complaints and Prosecutions has been audited by S. Wade Hunt, C. P. A., and the fines collected during the year as reported by him have been properly accounted for in the attached Statement of Receipts and Disbursements.

The changes in membership during the year were as follows:

Registered Pharmacists:

In good standing on December 31, 1904.....		5,071
Admissions during 1905:		
New members	248	
Re-admissions	25	273
		<hr/>
		5,344

Less:

Resignations, deaths and members not in good standing on December 31, 1905.....	194
Members in good standing December 31, 1905....	<hr/> 5,150

Assistant Pharmacists:

In good standing on December 31, 1904.....	818
Admissions during 1905:	
New members	143
Re-admissions	6
	<hr/>
	149
	<hr/>
	967

Less:

Resignations, deaths and members not in good standing	74
Members in good standing December 31, 1905....	<hr/> 893

Prior to January, 1905, the money received from apprentice applications was not entered on the regular books until the applicant had passed a successful examination or had taken two examinations and failed. Money which was received with incomplete assistant pharmacist and registered pharmacist applications was handled in the same manner, the fees being transferred to the regular books of the board only upon completion of the application.

In addition, the fees received with irregular requests for re-registration were only transferred to the books upon the requests being put in proper form.

There were also some amounts which had been received with applications for examination prior to the taking effect of the present law, and which are held subject to the wish of the applicants. All told, this "Trust Fund" amounted to \$711.50 on the first of January, 1905, none of which appeared on the regular books.

In January the board adopted a new rule in regard to handling such accounts. Every amount that comes into the possession of the board is now immediately entered upon the books. If it develops later that the applications upon which such payments are made are irregular, or that the applicants are ineligible, a voucher is made for the return of the money and the refund is made by check upon the treasurer.

During the year 1905, \$663.00 of the above mentioned "Trust Fund" of \$711.50 had been applied on application fees, returned to applicants or otherwise entered upon the books of account, leaving \$48.50 still in suspense. At our request the Secretary has now paid in this amount, thus finally closing the old "Trust Fund."

In addition to the cash balance of \$3,417.21, as shown by the attached Statement of Receipts and Disbursements, there was in the hands of the Secretary at December 31, 1905, a further sum of \$4,001.00, representing renewal fees, etc., received in respect of 1906.

Every courtesy and co-operation was extended to our representative by the Secretary and his staff during the examination.

Respectfully submitted,

WILKINSON, RECKITT, WILLIAMS & Co.

Certified Public Accountants.

The report gives a membership of 5,150 Registered Pharmacists and 893 Assistants. We are aware that these figures are only approximate as they do not give all removals nor do they show the number of Assistants who may have passed the examination of Registered Pharmacist in the same year in which they paid their renewals as Assistants.

But calling your attention to the relative proportion of these two figures, you will notice that there is *not one* Assistant to every *five* Registered Pharmacists. We feel that something should be done to induce young men

to take up the study of Pharmacy, so that the number of apprentices be increased (thereby increasing the number of Assistants), without lowering the present standard of requirements. Such a step would be a material help.

In comparing this report with that of 1904 you will find a slight *decrease* in the number of Assistant Pharmacists by examination as well as in the renewals of the same; but a good increase in the number of Apprentice Applications, from 399 in 1904 to 785 in 1905, nearly 100 per cent.

The receipts of the board for the year 1905 were \$17,323.70 and the disbursements amounted to \$17,386.31.

The balance on hand at the close of the year was \$3,417.21.

The small excess of the disbursements over the receipts is partially accounted for in the items of Equipment of Prescription Cases and Typewriters in Chicago and Springfield offices, amounting to \$656.77.

There is no longer a "Trust Fund." All the moneys received with applications are entered on the books in regular form, and, in case of refund the amounts are entered among miscellaneous disbursements.

Your committee also examined books and records of the Committee on Complaints and Prosecutions, which had been audited by Mr. Wade Hunt, certified Public Accountant, and find them also correct.

But the reports of said Committee do not show in cases where judgments were obtained what part of the law had been violated.

Therefore we are unable to state how many of all the cases tried were violations of the Cocaine Section. This we would have been glad to show at this time, when so many unjust charges have been made by the daily press, and so much uncalled for criticism has been hurled at our profession by newspaper reporters, cartoonists and uninformed reformers.

Notwithstanding the present sensational flash-lightnings by the press, this terrible traffic is not nearly so extensive as it was a few years ago. When the law was on the criminal code of Illinois it was only a dead letter, but since it has become a part of the Pharmacy law it has become operative. Let it be known to the world that the State Board of Pharmacy has done its duty justly and fearlessly!

Whatever has been done to suppress this traffic, and to punish the scoundrels who were selling human souls to shame and ruin has been done *not* by the press nor by notoriety-seeking reformers, but by the chairman of the Prosecution Committee of the State Board of Pharmacy.

Permit us to state right here, that the pharmacists of Illinois through the State Board have not only been active in suppressing this traffic, *but are paying the expenses of the prosecutions!* This work is, however, difficult and expensive and never has been nor ever will be a source of revenue to the Board of Pharmacy. In 1905,

as in the previous year, the expenditure was about twice the amount of fines collected.

The State Board of Pharmacy has never accepted a penny from any defendant. All fines have been collected by a justice court in regular session; thereby preventing any possible compromise between defendant and the Board.

In conclusion, we beg leave to state, that in the last two years no appointments to the Board of Pharmacy have been made, as provided by the Statute of Illinois in Section 9 of the Pharmacy Law.

Respectfully.

H. F. W. SPILVER, *Chairman*.

ALBERT ZIMMERMANN.

WM. D. DUNCAN.

Committee on Board of Pharmacy Records.

MR. LUEDER—The report is very complete and shows the good work that has been done by the members of the Board and its Secretary. I move you that the report be received and concurred in and printed in the published proceedings of this meeting.

PRESIDENT GARVER—You have heard the motion which has been seconded.

MR. BARTELLS—In regard to that last item with reference to non-appointment of members of the Board I would like to ask if there are any recommendations.

MR. LUEDER—That may be discussed.

MR. SPILVER—I want to state that we did not think it was within our jurisdiction to make any recommendations. We only mentioned it and leave it for your action.

MR. BODEMANN—The chairman of this committee has been kind enough to submit the last part of the report to me before he handed it in. In the report of fines it should state what the fines were collected for—whether for violation of the cocaine law, neglect in renewing certificates, etc. The expert accountant who went over the dockets should have done this. The report should show precisely what each item was collected for. I would have told him to show this had he asked me and it will be done in the future.

The report of the committee was then adopted without further debate.

MR. AVERY—I do not think we ought to pass this matter by without having special attention called to the fact that the appointments have not been made to fill the vacancies on the Board of Pharmacy. It appears to me that this is a matter of vital importance. If the pharmacy law is worthy of respect then the enforcement of it should have the co-operation

of the Governor. I feel that the druggists are not being treated fairly by the Governor. We have cause for complaint about lack of courtesy. I therefore wish to present this resolution.

VOICE—The resolution should go to the committee on resolutions.

PRESIDENT GARVER—Our action yesterday was to the effect that every resolution offered on the floor should go to the committee for its recommendation.

PRESIDENT GARVER—The gentleman will please read the resolution.

Mr. Avery thereupon presented the following resolution.

Resolution.

WHEREAS, The Pharmacy Law of our state has been in effective operation since its passage, has been productive of great good to the citizens of this state through insuring a higher degree of proficiency in the dispensing of drugs and medicines, and productive to a notable degree of greater purity and value in the quality of the medicines dispensed, and

WHEREAS, The entire expense of carrying on the work of the Board of Pharmacy, including the enforcement of the Pharmacy Law, has been borne by the pharmacists of the state themselves, this heavy burden being carried by them practically without complaint, in the belief that the Board of Pharmacy should ever be constituted a non-partisan body, and in the further belief that the best observance of the law would follow an impartial enforcement of its provisions, and

WHEREAS, It is highly desirable that the greatest respect for the Pharmacy Law by the pharmacists of the state should be encouraged, and that proper respect for the law is endangered through the neglect of the Governor of the state to fill the vacancies which have occurred upon the Board during the past two years, and

WHEREAS, The Illinois Pharmaceutical Association has each year "recommended to the Governor the names of at least three persons whom said Association has deemed best qualified to fill such vacancies," as provided by Section 9 of the Pharmacy Law; therefore be it

Resolved, That we, the members of the Illinois Pharmaceutical Association, in annual session assembled, hereby urge upon the Governor the filling of the vacancies which have occurred in the Board of Pharmacy without further delay.

MR. AVERY, continuing—I now move you, Mr. President, that the rules be suspended and that the resolution be adopted.

After a lively debate the rules were suspended and the resolution was adopted.

PRESIDENT GARVER—We will now hear the report of the executive committee.

REPORT OF EXECUTIVE COMMITTEE.

To the Members of the Illinois Pharmaceutical Association:

The executive committee met at the Palmer House in Chicago at 2:00 o'clock p. m., November 16, 1905, President Garver presiding.

The following members of the committee responded to their names on the roll call: Messrs. Avery, Boehm, Fry, Gale, Schaper, Straw, Hall, and Baum.

Others present were George Bollinger, Chairman of the Committee on Trade Interests; H. F. W. Spilver, Chairman, and W. D. Duncan, member of the Committee on Board of Pharmacy records, and Messrs. George W. Mathison, H. W. Medbery, W. D. Rowles, and E. A. Pickard of the Illinois Pharmaceutical Travelers' Association.

Upon motion of Mr. Fry it was ordered that the selection of a subject for the prize essay for the next annual meeting be left to the President and Secretary.

After a discussion as to the time of holding the next annual meeting in Peoria, which was participated in by the members of the committee and by representatives of the Travelers' Association, upon motion of Mr. Gale it was ordered that the meeting be held on Tuesday, Wednesday, and Thursday, June 19, 20 and 21.

The following recommendations for the voting card for 1906 were received and approved:

First to tenth congressional districts, inclusive (Cook and Lake counties)—Board of Pharmacy, W. H. Brown, John Conrad, P. E. Finninger, William Krizan, E. H. Ladish, I. L. Quales, H. F. W. Spilver, John Stuchlik, James H. Wells, all of Chicago, and G. P. Mills, Evanston. Advisory Committee, Frank Ahlborn, John J. Boehm, H. N. Bruun, V. H. Chantler, F. E. Falkenberg, J. E. Grubb, L. P. Larsen, R. E. Rhode, Charles F. Rice, and W. C. Scupham, all of Chicago.

Eleventh Congressional District—Board of Pharmacy, A. L. Brooks, DeKalb. Advisory Committee, H. J. Baumann, Dundee.

The Secretary reported that the executive committeemen from all of the other congressional districts had been requested to send in their recommendations for the voting card. Upon motion of Mr. Straw it was ordered that these recommendations, when received, be approved and that the President and Secretary be authorized to complete the voting card for the congressional districts from which no recommendations are received.

The following recommendations were received later:

Thirteenth Congressional District—Board of Pharmacy, Charles P. Guenther, Freeport. Advisory Committee, John D. Covell, Forreston.

Fourteenth Congressional District—Board of Pharmacy, August Heimbeck, Rock Island. Advisory Committee, M. Brewer, Monmouth.

Fifteenth Congressional District—Board of Pharmacy, A. B. Clark, Galesburg. Advisory Committee, Henry J. Losch, Kewanee.

Sixteenth Congressional District—Board of Pharmacy, Robert D. McDougal, Peoria. Advisory Committee, William H. Mead, Chillicothe.

Eighteenth Congressional District—Board of Pharmacy, F. E. Kespler, Georgetown. Advisory Committee, T. S. Arnold, Watseka.

Nineteenth Congressional District—Board of Pharmacy, Harry D. Oldham, Urbana. Advisory Committee, George M. Bennett, Urbana.

Twentieth Congressional District—Board of Pharmacy, C. H. Harder, Pittsfield. Advisory Committee, Charles DuHadway, Jerseyville.

Twenty-first Congressional District—Board of Pharmacy, J. Frisch, Springfield.

Twenty-fourth Congressional District—Board of Pharmacy, H. J. Humma, Metropolis. Advisory Committee, N. E. Prince, Enfield.

Twenty-fifth Congressional District—Board of Pharmacy, M. C. Metzger, Cairo. Advisory Committee, George H. Wood, Mounds.

The following names for voting cards were recommended by the President and Secretary as per instructions of the committee:

Twelfth Congressional District—Board of Pharmacy, J. H. Keeling, Rockford. Advisory Committee, W. D. Duncan, Ottawa.

Seventeenth Congressional District—Board of Pharmacy, G. F. Lester, Arrowsmith. Advisory Committee, Harry W. Giese, Bloomington.

Twenty-first Congressional District—Advisory Committee, W. O. Steinmeyer, Carlinville.

Twenty-second Congressional District—Board of Pharmacy, Thos. Knoebel, E. St. Louis. Advisory Committee, W. D. Harnist, Edwardsville.

Twenty-third Congressional District—Board of Pharmacy, L. H. Broom, Effingham. Advisory Committee, William Bower, Olney.

Upon motion of Mr. Straw it was ordered that the special committee on legislation be authorized to recommend in its report to the Association in June, such changes in the present pharmacy law as it might deem proper, in addition to reporting the draft of a narcotic bill as per its instructions at the last annual meeting.

Upon motion of Mr. Fry the committee adjourned to meet at the call of the chairman.

Respectfully submitted,

R. N. DODDS, *Secretary*.

Upon motion of Mr. J. F. G. Helmer, amended by Mr. Bartells, the report of the executive committee was adopted.

PRESIDENT GARVER—There is one report that we left over from yesterday's meeting. The report will be made by a gentleman who generally

looks after the interests of the retail druggists of this country. I refer to Mr. Wooten who will now give us the report of the N. A. R. D.

MR. WOOTEN—*Fellow Druggists of Illinois*: The subjects I wish to discuss with you today are all embraced in the reply to the question:

IS OR IS NOT THE N. A. R. D. FULFILLING ITS MISSION?

In answering this question I reply that in my opinion it is doing so in part only, and that there are serious obstacles in the way of its success that are yet to be overcome.

Disappointing as this answer may be to some unreasoning optimists, there is not a syllable of expressed or implied pessimism in it. The best of reasons exist why the druggists of America should now consider this matter without prejudice or bias—should view the N. A. R. D. in its true relation to other subjects that vitally affect their welfare. There is *no* reason why they should not examine this movement openly, critically, to determine what have been its attainments, what are its prospects, what are the reasonable hopes entertained for it by those who are directing its energies.

There was a time when kindly consideration for the Association's welfare required that too careful scrutiny into its affairs should not be made. At that time general knowledge of its pitiable weaknesses, known only too well to those who nursed it during the years it struggled, at times almost hopelessly, for life, would have been fatal to its prospects. Such knowledge if possessed by the retail drug trade would have sapped the little vitality the Association had and shortly in the language of the Scripture, "the place thereof would have" known it "no more forever." Now, happily, all is changed. The sickly plant has grown into a healthy sapling; it has withstood enough of the droughts and storms that threatened its existence to justify the expectation that it will grow into a mighty tree, provided its growth is not stunted by unwise management, or it is not allowed to die for want of the sunshine and moisture of moral and financial support.

At the risk of being considered a faultfinder I am going to say, here, some plain things that it seems to me ought, in all candor, to be said. In doing so I trust my motives will not be misunderstood. The direction of the least resistance lies to the opposite point of the compass, but duty to my fellow druggists impels the putting forth of some thoughts in relation to this subject that, in my opinion, are worthy of most careful consideration. A failure to express these thoughts would stamp me as unworthy the position I hold in this great movement with which we are identified, from which movement so much has been expected, from which so much is reasonably to be expected.

In spite of the phenomenal success which has attended this effort to

improve bad conditions, close study of the relationship of the N. A. R. D. to the druggists of America and of the relationship of these druggists to the Association compels the acknowledgment that through ignorance or sloth or, most probable of all, through *indifference*, the N. A. R. D. and the opportunities it has presented and is presenting, have in the case of many druggists utterly failed of appreciation. To such an extent is this true that the apparent inability of thousands of druggists to grasp the situation and to make use of it to their own advantage is little less than marvelous.

From time to time, usually in private though on rare occasions in public, the N. A. R. D. has been spoken against as having failed to accomplish anything of real value; as being an expensive luxury that does not justify its existence. To defend the organization against these absurd aspersions would seem to be a waste of energy, but a consideration of them affords me opportunity to place before you properly my reasons for saying that the N. A. R. D. movement and the opportunities it presents have not been held, by those the Association was created to benefit, in the proper esteem.

Every well informed druggist knows that in 1893, when the N. A. R. D. was formed, the condition of the drug business was wretchedly bad. At that time the feeling of helplessness and hopelessness which pervaded the entire trade was so pronounced and so universal that it took years to infuse sufficient life and sufficient courage into our people to induce them to go to work on their own behalf to render these conditions less unendurable.

Nor was this the worst. The retail trade had completely lost the spirit of independence that ought at all times to characterize it. For six years after the Association began its career, a large proportion of the expense of maintaining the organization was paid, every year, by donations from the proprietary medicine manufacturers. One appeal after another was made to these people to keep the Association alive. Could there be a more striking illustration of the self-imposed helplessness and lack of proper spirit on the part of any class of business men? Thanks to the manly attitude the National Association has at last caused the retail drug trade to assume toward the remainder of the business world, the organization is now self supporting—a condition which we are confident will continue. And this is only an intimation that other badly needed and radical changes can and will result from the Association's inspiring influence.

Before any structure that is worth while is built, a suitable foundation for it must be laid. The stronger the foundation the better and more enduring may be the structure erected upon it. It was two years ago that the N. A. R. D. cut loose from the proprietors' money and determined to support their institution themselves. By that act the organization completed its foundation; it is now building its superstructure. If slow progress has been made in accomplishing expected results, this must not

be charged to lack of virility in the Association but to the dire necessity of overcoming, through years of patient, persistent labor, conditions the badness of which only those who themselves engaged in this pioneer work can have any just conception.

The American Pharmaceutical Association is held in high esteem by the average druggist, a fact that is greatly to his credit. But even that organization has failed of adequate appreciation by the rank and file of retail druggists for the incalculable benefits it has conferred upon the pharmaceutical world as well as the world of science. But there are some druggists who doff their hats to that organization who withhold from the N. A. R. D. esteem equally deserved because of the good it has accomplished.

These organizations cover different fields, but they both have for their main object the improvement of the conditions of those engaged in purveying drugs and medicines, whether their occupation is designated as practicing pharmacy or conducting a drug business. Of these associations one has had fifty-two years of life, the other only eight; until recently one has had a free field, being wholly untrammelled as a national conservator of the needs of those engaged in our calling; to the contrary, the other has always been looked down upon, decried, and in some instances *sneered at* by certain reputed professional pharmacists.

Strangely enough this has been the attitude of a few *teachers* of pharmacy who ought to have respect enough for the men whose money is supporting their institutions, namely, the retail druggists of the country, to deter them from maligning the efforts of these druggists to establish more satisfactory conditions in which to ply their overworked and underpaid vocation. If these teachers are too obtuse to recognize the absurdity of deriding for no other than whimsical reasons the organization that above all others is enabling druggists to meet their financial obligations, then they should be taught in the manner most likely to yield satisfactory results, the value of maintaining a discreet silence.

Let it be said in this connection that the N. A. R. D. is handling conditions as it has found them. The ground upon which the battle for better compensation for druggists is being fought was not ground of the Association's choosing; but it is fighting there because it apprehends that its duty is—first, last, and all the time—to make the drug business *pay*. That it is not oblivious to the obligation to establish and maintain our vocation on a high moral plane has been abundantly proved; that it will through experience and painstaking endeavor enlarge its usefulness in correcting abuses which afflict the public and which cast odium upon those engaged in our calling, is also true. By every means at its command it is striving to meet fully and completely the needs of the men whose daily

bread and whose position in the business world depend upon the esteem in which their calling is held by the public.

While it is undeniably true that the N. A. R. D. is far from perfect, yet, judged by any standard one may care to set up, no organization ever has existed that more certainly deserves the confidence, the gratitude, the loyalty, of retail druggists. What its faults are no one realizes so clearly as those who have for years given their best thought to its advancement; but no organization of the sort ever has existed or ever will exist that could not be improved upon. Faultful as the Association may be, it will be universally admitted, by those who know the facts, that the N. A. R. D. is deserving of the encomium than which none higher can ever be pronounced upon any institution,—*it has made the most of its opportunities.*

Let no one imagine that in using the American Pharmaceutical Association as an illustration I intend to reflect in the slightest degree upon that grand organization. I could not, even if I were disposed, dim the luster of that magnificent enterprise which has behind it more than half a century of usefulness. Far from desiring to do it injury, no one could be more loyal to its welfare than I; no one could place a higher estimate than do I upon its deserts. A member for thirteen years, I have rejoiced in its greatness, have contributed my mite to its usefulness and shall continue to champion its interests. Rightly directed there is no conflict between the A. Ph. A. and the National Association of Retail Druggists. On the contrary, there is every reason why the two organizations should work zealously for each other's advancement. In the case of the N. A. R. D., this is being systematically done.

Those who are best informed say, and they have excellent reasons for making the statement, that the present prosperity of the American Pharmaceutical Association is due in a very large measure to the development of the organization spirit which has been brought about by the N. A. R. D. In their work for the National Association the travelling representatives of the N. A. R. D. never fail, whenever a chance is presented, to say a good word for the A. Ph. A., to praise its achievements, and to encourage druggists to ally themselves with it. Visiting one store after another, as they do all over the country, the combined influence of these men to the advantage of the A. Ph. A. is, as must be realized, very great. The building up of the spirit of fraternity among the druggists is alone worth all the N. A. R. D. has cost; it is an enduring monument to the wisdom of those who formed the organization and to the zeal and persistence of those who have executed its plans.

The censors of the National Association who talk about the rather large sum of money placed in its hands every year give only superficial thought to this subject, otherwise some of their alleged criticisms (unreasonable faultfindings they are, in reality), would never be uttered. Many of these

critics are well meaning druggists whose business education and whose environment unfit them for appreciating the enormous task the executives of the National Association are trying, against heavy odds, to perform. Last year these executives spent for all purposes \$79,924. This year's work will cost somewhat more. If the best interests of the drug trade of the country were served the expense this year would be very *much* greater; but as long as the penny-wise-pound-foolish disposition manifested by some druggists cripples the N. A. R. D., preventing needed enlargement of its activities, just that long will our work be only *partially* successful instead of *wholly* successful, as was pointed out at the beginning of this address.

Now let us take a common sense view of this subject. The largest single item in last year's outlay was the travelling expenses of our representatives. In the first place the sending out of these representatives is imperatively necessary. It is not a whim of the committee; on the contrary the effort to collect the Association's dues by mail, and to increase the number of its affiliated associations by mail, was demonstrated through years of the most strenuous endeavor to be an *abject failure*. If the custom of sending out organizers to stimulate interest in association work and to form new organizations had not been adopted and resolutely adhered to by the National Association, the enterprise would have gone long ago to that bourne from which no traveler hath e'er returned.

The sending out of organizers being a necessity, these men must travel in as good style as do the representatives of other concerns—wholesale drug houses, pharmaceutical manufacturers, and the like. The N. A. R. D. cannot afford to have its men stop at cheap lodging houses; indeed it cannot afford to employ for its work men who *would* put up at such places even if they were directed to do so. To serve the best interests of the retail druggists of America the affairs of the N. A. R. D. must be conducted in a thoroughly business-like way; attempt to make this work successful on any other basis would surely prove an ignominious failure.

Taking one week with another and including the long and expensive railway journeys sometimes imperatively necessary, the traveling expenses of our representatives now average \$28.50 per week. Since there 52 weeks in a year, the *annual* expense of any one representative would be \$1,482. Multiply this by 29, the number of men now in our employ, and you have a total of \$42,978, for the single item of *traveling* expenses of the organization force for a year. There is not one of these critics who could tell you how to avoid this expense, because we have proved that it *can not be avoided*. The same is true of every other item of the expense we have incurred. The sole reason for the annual expenditure of so large a sum is that an enterprise of this magnitude cannot be carried on with

a few hundred dollars. To imagine so is to underestimate pitifully the scope of our labors, the possibilities of this great undertaking, on behalf of our fellow druggists.

To throw additional light upon this subject of the Association's finances, suppose that every one of the more than 37,000 American druggists should contribute *one penny a day* to the maintenance of this work. The aggregate sum so realized would approximate \$135,000 or practically double what was spent during the whole of last year in the prosecution of our work. And yet the critics I have referred to point to the handling of this money by the National Association as though the collection of it, however desirable the ends to be accomplished through its use, *impoverished* the retail drug trade. Think of it; the price of one stick of chewing gum daily imperilling the financial welfare of the members of our calling! Could anything be more absurd!

The truth of the matter is this: The National Association of Retail Druggists is conducting an enterprise worth at least a million dollars every year to the druggists of this country at an expense considerably less than a hundred thousand dollars, and it has demonstrated its ability to continue to bestow benefits on the retail drug trade in this ratio of expense to results. On this showing ought the Association to be adversely criticised or should it be applauded for its actions? Let those answer who believe in a square deal for themselves and who are willing to accord a square deal to others.

In spite of the temptation so to do I shall not devote the valuable time of this Association to narrating in detail how the N. A. R. D. has benefited, and is benefiting every druggist in America every hour of every day. These benefits are readily apparent to those men who have their wits about them and who are willing to acknowledge the good things they receive. As for those who are incapable of gratitude, the Giver of all Good sends them His sunshine and rain equally with those who are deserving, and in the very nature of things we can not do otherwise. Whether the endeavors of the N. A. R. D. are appreciated or not, the Association is patiently working, month after month, year after year, to make the drug business a better paying proposition, not only in financial returns but in every other way that helps to constitute it a satisfying vocation. It is earnestly endeavoring to adapt the means at its disposal to the ends so urgently needed. Whether its work lies in the field of legislation or in the organizing and strengthening of national, state, and local associations; whether in the arousing of druggists to an appreciation of their *individual responsibilities* to push forward this great movement or in formulating new plans and policies for securing the results we covet, it is never asleep, it is always alert to serve faithfully, enthusiastically, those whose needs called it into existence.

Is the N. A. R. D. a success? Go through the blackened streets of the city by the Golden Gate where earthquake and fire destroyed in a few hours the work of years in creating substantial businesses, in building comfortable homes. Ask the druggist whose all was swept away, who has almost abandoned hope of getting from the insurance companies the pittance he is entitled to, and who sits sad-hearted amid the ruins of his business and his home—ask *him* what he thinks of the N. A. R. D. "Sir," he will tell you, "my only hope of getting another start, of rebuilding my business, of re-establishing my home lies in the help the N. A. R. D. is giving me. God bless the men throughout this land who are supporting that grand organization which is so effectually teaching druggists the meaning of "to live and let live" and the meaning of that still nobler motto, "to live and *help live!*"

MR. SOREN MATHISON—I move the adoption of the report.

MR. HENRY CROSBY—It seems to me that so excellent a paper as this should be placed in the hands of every druggist in Illinois. There is only about 3 per cent of the druggists here. The vast majority of them seem to take no interest in meetings of this character.

MR. MATHISON—I move you, Mr. President, that it be printed in pamphlet form and a copy be sent to every druggist in the state.

MR. AVERY—I would amend that motion by asking the Association to request that it be printed in Notes. I would like to ask Mr. Wooten if this can be done.

MR. WOOTEN—If the Association desires we will be very glad to print and distribute it.

The report was then adopted with the request that it be printed in Notes and a copy of it be sent to every druggist in the state.

PRESIDENT GARVER—We will now hear the report of the committee on trade interests by Mr. H. D. Oldham.

REPORT OF THE COMMITTEE ON TRADE INTERESTS.

To the Members of the Illinois Pharmaceutical Association:

According to the by-laws of this Association it is the duty of the Committee on Trade Interests to report at each annual meeting such information on trade conditions, as may seem to them of interest to the Association; in other words, the members of the committee on trade interests are the time-keepers of progress.

No careful student of conditions in the pharmaceutical field will deny that a decided evolution in pharmacy is upon us.

On one hand we see powerful forces make a determined attack upon the proprietary medicine industry, with which we are more or less closely

connected as agents and whose products furnish a large part of many of our stocks; on the other hand we observe great individual and organized activity displayed in behalf of Pharmacopœial and National Formulary products.

The American Pharmaceutical Association has invited every state association to join hands with it in discussing at the annual meetings this year ways and means to make the preparations of the Pharmacopœia and the National Formulary more popular with physicians.

The American Medical Association, prompted by a sense of justice to the public and by self-interest has decided to put a ban on secret nostrums.

During the past year many members of this Association as well as a large number of pharmacists in other states have rendered to the cause of ethical pharmacy faithful and efficient service by bringing the new Pharmacopœia, with its changes and additions, to the attention of physicians.

A large amount of capital is invested by the members of this Association in proprietary remedies and we are therefore not altogether disinterested spectators of the attack that is being made against them. One state association this year adopted resolutions, commending the crusade of certain magazines against proprietary medicines. While we deplore the evils existing in the proprietary medicine industry, our sense of justice and desire for fair play should prevent us from indorsing unwarranted statements made in the magazines.

Our efforts in behalf of ethical pharmacy, while we continue to be distributors of proprietary medicines, have caused some critics to accuse us of inconsistency; we plead "not guilty" to the charge, on the ground that we are not responsible for the system of self-medication in vogue; it is perfectly natural that we should supply the existing demand.

At last year's meeting of this Association the subject of "scarcity of clerks" aroused considerable discussion; we regret to report that "drug store help" is still scarce, but we do not hold the educational test of apprentices responsible.

The heavy demand for wage-earners in mercantile and manufacturing enterprises leaves an insufficient number of young men, who turn to the profession of pharmacy.

We deplore the trade-demoralizing practice of issuing trading stamps and cash-register rebate checks; no permanent good can result from either of these profit-eating schemes.

At the Boston Convention the N. A. R. D. established a National Telephone Committee with W. H. Gale of Chicago, as Chairman. All local associations of Illinois are earnestly requested to avail themselves of the assistance this National Committee can render, towards emancipating our craft from the expensive nuisance of the "free lunch telephone system" now so satisfactorily eradicated in various cities throughout this country.

This report would be incomplete, if we failed to call your attention to the services rendered to the retail drug trade of America by the N. A. R. D.

The open and secret enemies of that organization have tried to crush it. They have recently invoked government aid to prove and stamp it a so-called trust.

The history of the N. A. R. D. is an open book; it claims for its members the right to make a decent living and to employ all lawful means to attain that end.

Your committee makes the following recommendations:

We urge every member of this Association to aid in the good work of keeping physicians interested in the Pharmacopœia and the National Formulary, in order that empiricism in the practice of medicine may decrease and that physician and pharmacist may work in harmonious union to alleviate human suffering, each occupying his natural sphere, the former to diagnose disease and prescribe the remedy and the latter to prepare the prescription.

We recommend greater individual activity in furnishing to physicians samples of official preparations and suggest that the officers of this Association co-operate with local druggists' associations in supplying exhibits of U. S. Ph. and N. F. products for state and local meetings of medical societies.

We hope you will give your moral and financial support to the American Pharmaceutical Association, which for over half a century has stood for high ideals in the practice of pharmacy.

We recommend that this Association continue its affiliation with the N. A. R. D.

GEORGE BOLLINGER.

On motion the report was adopted and ordered printed in the proceedings.

PRESIDENT GARVER—The next number on our program is the most important report of our proceedings. It is the report of the committee on legislation by Mr. Charles H. Avery.

MR. AVERY—As the consideration of the report will take some time I think if it would be desirable to make it a special order of this afternoon.

PRESIDENT GARVER—We had hoped that we could get through with this report at this session.

MR. AVERY—It will require a very long session. If we have other business I think it would be better to put off the report till afternoon.

PRESIDENT GARVER—We are already considerably behind with our program.

MR. AVERY—Can't we change the hour of the afternoon session?

MR. BARTELLS—Let me suggest that the attendance may not be as large

this afternoon as it is this morning. Some of the delegates are expecting to leave on the afternoon train.

After some further discussion the report of committee on legislation was made a special order for the afternoon session immediately upon convening of same.

MR. BODEMANN—All of us want to be home on the 4th of July. In order to get there by that time the discussion of the report of the legislative committee must be limited. It is very desirable that anybody who has any ideas on the subject of legislation should be heard. I therefore move you Mr. President, that discussion be limited to three minutes and that nobody be permitted to speak twice upon the same subject until all who desire to speak have been heard. I hope this motion will prevail and that it will be enforced strictly by the President. I hope the enforcement of it will hit me the hardest.

The motion was seconded and carried without further debate.

PRESIDENT GARVER—The next thing in order is the report of the advisory committee of the school of pharmacy by Mr. Forsyth.

ANNUAL REPORT OF THE ADVISORY BOARD OF THE UNIVERSITY OF ILLINOIS SCHOOL OF PHARMACY.

To the President and Members of the Illinois Pharmaceutical Association.

Your advisory board desires to report that the School of Pharmacy has had a prosperous year; the total number of students enrolled being 173; the number of graduates 43.

During the session, a course of lectures on business topics was given, under the supervision of the Advisory Board. Among those who gave lectures before the classes were Messrs. Ebert, Bodemann, Forsyth, J. Giles Lewis, A. D. Thorburn, F. H. Hertle and Dr. Hugh Wisdom. The lectures were well attended and will be continued during the coming session.

The term of Mr. George M. Bennett, of Urbana, expired last fall, and Mr. Frank Thomas, of Cairo, was appointed to succeed him.

In the report of the Advisory Board for 1902, a recommendation of considerable importance was made, which we believe has never been acted upon. It was that a free scholarship in the School of Pharmacy be offered in each district of the state to one high school graduate from that district, the only condition being such candidate shall be registered as an apprentice and have had not less than one year's experience in pharmacy. We believe that the suggestion is a good one and would recommend that the University be asked to offer such scholarships. Free scholarships in va-

rious other departments are now offered by the University. Why not in pharmacy?

In the same report the suggestion was made that the Board of Pharmacy utilize the laboratories of both schools in Chicago. We understand that the free use of these facilities has been repeatedly offered to the Board. By utilizing these facilities, the examinations could be extended and made more efficient.

In conclusion we would urge the necessity for action toward getting an appropriation for the School at the next session of the legislature. The university authorities, both President and Trustees, are heartily in favor of such an appropriation and will do all they can toward securing it. It remains only for this Association to make a strong and determined effort. Such assistance will be of the greatest value to the School and will make for the betterment of pharmaceutical education in the state.

ALBERT E. EBERT, Chairman.

W. B. DAY, Secretary.

WM. K. FORSYTH.

MR. FORSYTH (continuing)—At the time this report was made the Board of Pharmacy was renting a room on 39th St. The School of Pharmacy offered it the use of its laboratories in which to hold its examinations thereby saving considerable expense. I am informed that the Board has recently secured quarters at the Northwestern University building.

MR. BODEMANN—An offer was made to the Board of Pharmacy by both schools. We looked into both of them and deemed it best not to accept the free use of either. We have rented a large room in the Northwestern University building, for which we are paying the rental asked and are not accepting the free use of anything.

The report of the advisory committee was then adopted and ordered printed in the proceedings.

PRESIDENT GARVER—We will now hear the report of the special committee on the School of Pharmacy.

PROF. DAY—Mr. Scherer, the secretary of the special committee, is not here. So far as I know the committee has not done any work during the past year. In fact it could not do anything since the legislature has not been in regular session since our last Association meeting. I think it very desirable that this committee should be continued as the legislature will again be in session next winter, and I make a motion to that effect.

The motion was seconded and carried without debate.

MR. BODEMANN—I move you, Mr. President, that a committee be appointed to report to the executive committee next fall on our duty as pharmacists toward the advertising methods of manufacturers of medicines

which claim to contain something they do not contain, or which claim not to contain what they do contain and which promise to cure what they do not cure.

PRESIDENT GARVER—I understand that a committee to which the annual address of the President was referred is ready to make its report. I will ask Vice President Porter to take the chair while the report is under discussion.

With Vice-President Porter in the chair, the committee on President's address presented the following report:

REPORT OF THE COMMITTEE ON PRESIDENT'S ADDRESS.

Your committee to which has been referred President Garver's address, begs leave to report as follows:

1. We are in favor of the Narcotic Bill as recommended by the Legislative Committee.

2. In regards to the renewal of certificates, your committee favors the continuing of the present system.

3. Your committee favors the resolution adopted at the last convention and again recommended in the President's Address that the proper health officer should sign the death certificate instead of the physician who dispenses his own medicines.

4. We coincide with the President's views that higher educational qualifications are greatly to be desired as a standard for full registration and therefore recommend that the Association require graduation from a Pharmacy School.

5. The remarks of the President regarding the increase of membership of the N. A. R. D., A. Ph. A. and I. Ph. A. are well worth considering.

Respectfully submitted,

JOHN STUCHLIK.

GEO. M. BENNETT.

W. O. STEINMEYER.

The report of the committee was unanimously adopted without debate.

PRESIDENT GARVER (in the chair)—If the committee to which the report of the Secretary and the report of the Treasurer were referred is ready to report we will receive it now.

REPORT OF THE AUDITING COMMITTEE.

To the Illinois Pharmaceutical Association: We, the Committee appointed to audit the books of the Secretary and the Treasurer, present the following as our report:

We find the Treasurer's books well kept and in accordance with the statement made to the Association.

We find the Secretary's books in excellent condition and we believe them to be correct. They correspond with the statement made by the Secretary as well as the statement made by the Treasurer. We find, however, that it is impossible for us to determine what amount of money was received by the Secretary for dues of members. We have no doubt the statement made by the Secretary is correct, but to the end that auditing committees appointed in the future may not suffer similar embarrassment we make the following suggestion:

We recommend that hereafter all receipts given for dues shall be serially numbered, the number to correspond with a number on the receipt stub which is retained in a permanently bound book.

Respectfully submitted,

THOS V. WOOTEEN,

WM. K. FORSYTH,

PAUL G. SCHUH,

Auditing Committee.

The report of the committee was unanimously adopted without debate.

PRESIDENT GARVER—I understand that Secretary Timberlake of the Indiana P. A. is with us this morning. We would like to hear from the Indiana Secretary.

SEC'Y TIMBERLAKE—Mr. President and Members of the Illinois Pharmaceutical Association: I am delegated by the President of our Association to bear to you the greetings of the Indiana Pharmaceutical Association. We are always proud of the fact that we are so close to Illinois because your state started the movement which culminated in the organization of the National Association of Retail Druggists. We in Indiana are as proud of this movement as is Illinois. We are proud of the Gladstone of Pharmacy, Mr. T. V. Wooten.

Our convention will meet a week from to-day and we hope to see a large number of Illinoisans at our meeting. We will try to take good care of you. I really am too ill to make any extended remarks and I will therefore close by thanking you for this opportunity of addressing you.

PROF. DAY—If I am in order I would like to offer the resolution that was adopted by the Chicago branch of the American Pharmaceutical Association at its June meeting and which I, as Secretary, was directed to send to the Secretary of this Association. Our Secretary informs me that this resolution was received but that he cannot now place his hands on it. In order that it may get in and be considered I want to present a copy of it.

The resolution was read, and referred to the committee on resolutions.

(For text of it, see the report of the committee on resolutions.)

PRESIDENT GARVER—We will now hear the report of the Committee on Prize Essays.

PROF. DAY—Your committee to which was referred the prize essays recommends that the first prize be awarded to Mr. H. F. Schaper and that the second be awarded to Mr. Thos. Rixleben.

On motion of Mr. Boehm the recommendations of the committee were adopted, the prize essays were read by their authors and were ordered printed in the proceedings.

HOW CAN THE ILLINOIS PHARMACEUTICAL ASSOCIATION BE MADE MORE USEFUL TO THE RETAIL DRUGGIST AND HOW CAN HE BE PERSUADED TO GIVE IT HIS SUPPORT.

BY HENRY F. SCHAPER.

The usefulness of an association is assured to all who avail themselves of the advantages offered to just the same degree as their interest in the association is aroused. Its possibilities cannot be overestimated. A lukewarm member may never reap any benefits of being a member of this Association; a druggist who has the Association at heart will derive benefits of inestimable value. Not alone that; he will help create that interest which is so essential to make this Association useful to its individual members.

There is no doubt that all those who are present at these meetings come with the avowed purpose of learning something of value, commercially as well as professionally. The reading of scientific papers, discussion of prescriptions, relating experiences as to the best methods of making galenicals will no doubt arouse the interest and afford valuable knowledge by which every one will be benefited. Papers on the manufacture of a multitude of preparations now bought which can be made by the druggist and ought to be prepared by him; the money saved being a very important item from a commercial standpoint. The experience gained in the making of semi-mysterious Pharmaceuticals is an item which cannot be bought and when once acquired is a continual source of revenue; last, but not least, your standing with the physician. With the limited knowledge of materia medica with which doctors are equipped it is up to the pharmacist to lift the veil of mystery which covers the modern materia medica. Years ago the reading of papers before these meetings was the rule. Revive the habit; it is a good one. Our profession has received severe setbacks and commercialism has been forced to the front. Can we afford to have the profession, our vital part, strangled? Let it be uppermost always; the time will come when, with proper laws, pharmacy will have its standing among the professions which it deserves and ought to have. But it is only by persistent effort that we shall be able to counteract the evils of

having someone else do our thinking and of being mere vendors of pharmaceuticals. Can we stand idly by and let the shelves of our pharmacies become filled with nostrums? Let us be pharmacists! Let every one do his share to put our chosen profession on a higher plane. It is worth the effort.

Scientific papers or prize essays should all be printed in our proceedings for the benefit of all members whether present or not. The proceedings of these meetings form a valuable adjunct to my library of reference books. I read them over and over again and they could be made still more valuable.

The American Pharmaceutical Association puts high value on its proceedings. Why? The reason is apparent. Open the door and invite such scientific contributions as will benefit our membership; invite members to give us their experiences. I am sure any druggist interested enough to attend these meetings will be unselfish enough to part with some of his knowledge for the benefit of his brother druggists and for the good of the Association.

In my estimation, an article listened to in open meeting is so much more impressive than one read from a book. Competitive exhibitions of standard remedies of the Pharmacopœia and National Formulary made and displayed by members only, each exhibitor giving his experience in making the various preparations, would be a move in the right direction. Most of you will remember the very elegant line of National Formulary preparations exhibited by one of our members at the Bloomington meeting three years ago, which made an excellent impression on every one fortunate enough to be there. Let a yearly prize be set aside for exhibitions of this kind and it will bring big dividends. Most of our members, I think, are better practical than theoretical pharmacists. Particularly, now since the new Pharmacopœia is out, a great many preparations being entirely new to us, ought to be exploited. A committee should be appointed to work out a set of questions to be discussed, touching popular subjects, which would make the session extremely interesting and very valuable indeed. This is customary with several state associations. Let us not forget the fraternal relation we owe each other. Let us be brothers; let the annual meetings be like a grand family gathering, on an equal basis, everybody admitted on equal social footing. Extend the glad hand to every member, acquainted or not; if not, become acquainted; let the fraternal spirit predominate; let us rub elbows together, preach fraternity and for the sake of everybody do not forget to practice it.

Members will not forget a good sociable meeting. If you go home after having spent a few days with your brother druggists and have had a pleasant time, tell your friends about it. Perhaps some of them will become interested and joining our ranks develop into very valuable members.

Spread the gospel of the good fellowship which exists among us. With united effort and individual co-operation, I do not doubt this Association can be made the best in the country and the benefits accruing can be increased manifold. The social features of our meetings are certainly well taken care of by the Travelers' Association, but that should not deter us from lending a helping hand to make the entertainment still more enjoyable, especially to the families of our members. We are all interested in one and the same cause, quoting a part of the Declaration of Principles of one of the biggest fraternal organizations of druggists in the country: "To promote such harmony, that will, for all time, entwine us, in one indissoluble and unbreakable bond of Friendship, Duty and Confidence."

"HOW CAN THE ILLINOIS PHARMACEUTICAL ASSOCIATION BE MADE MORE USEFUL TO THE RETAIL DRUGGIST AND HOW CAN THE LATTER BE PERSUADED TO GIVE IT HIS SUPPORT."

BY THOS. RIXLEBEN.

To make the Illinois Pharmaceutical Association useful to the retail druggists you must interest them and then secure their attendance. Their support will follow.

The Secretary's report for 1904-05 shows 5,000 voting cards sent out, that means that many Pharmacists, but only 1,000 were voted; that is to say one fifth are members; out of this 663 were reported in good standing; of this number we have an attendance from 200 to 400; including our families and visitors. And about 75 to 100 carry on the business of the Association.

Now, gentlemen, this patient is sick, not financially but for want of arousing an interest in the 4,000 silent ones who only make one payment a year, and the law compels them to do that.

There are causes for this non-support. One of which I know is the scarcity of clerks and another is the Pharmacy law! A druggist attending this meeting should be excused or considered at his place of business. An amendment to this law for a three days leave of absence would increase your support and usefulness to the druggist two fold or more, but such amendment would be impossible. The Treasurer's report last year shows something like \$1,600 on hand, which speaks well for the officers of this Association. The last report for the business of the year shows a balance of a little over \$100. Now I believe that by spending more money along the line and working of the N. A. R. D. that the Association will not only be more useful to the retail druggists but more beneficial to the treasury. In order to make this Association more useful you must get the retail druggist to the meetings; you have got to spend some money, to advertise, to employ men to talk, to convince, to create an

interest in the druggist. Take his mind away from the things that have been detrimental to his business such as internal revenue rulings, new laws, drug trusts, law-suits, and write-ups in the periodicals and magazines.

Why not have a visiting committee representing this Association, and call on the Illinois druggists and give them a short and pleasant "con-talk," and do some solicitation and explanation of works and doings of our Association. If we can't do it call on the I. P. T. A. gentlemen. They have already put new life and interest in our meetings. I believe that this Association or any other will discourage the interest and support of the retail druggists by putting itself on record as it did last year in refusing to let the contestants for the prize essay, read their compositions at the meeting. There are a number of druggists who can make speeches while there are many others that cannot, but are able to put their thoughts on paper, and sometimes say some good things. I say give us more prize essays, more especially on subjects relating to our business; don't discourage the essayist but let him read his production and put in print everyone of these papers; you have the money.

This will encourage the timid druggist; this will excite an interest in our annual meetings; this will make him ambitious; increase his desire to come again. There is nothing that will bestir so much emotion as contesting for a prize publicly. Don't sit down on his production with your committees, but encourage him. Give him a chance and an opportunity to show you his thoughts one way or another. The majority of druggists have plenty of time to express their thoughts on paper and I believe in hearing them. Has not your attendance increased, has not your membership grown since the I. P. T. A. have combined their interest and meetings with us by giving these guessing contests and athletic events. Is not this evidence that we should have more contests during the business session? If time is too short cut out some of your resolutions and motions. Be more prompt to meet at your appointed hour according to the program. Give more contests on paper and I am sure that the retail druggist will give more of his support, and the Association not only be more useful and beneficial, but more congenial.

Among other prizes, the Association might offer a prize for the county that sends the greatest number of druggists in proportion to the number of retail druggists in the county.

Let us have some expression of thought on Scientific Salesmanship, besides new laws concerning our business, or something on commercialism. Educate ourselves to meet the great mail order houses and department stores, from which nearly all communities alike are suffering. Wake up to your own interest. It is dollars and cents the druggist wants, and it takes, these days, a shrewd salesman to get it with a legitimate living profit.

Then the retailer will be easily persuaded to give the Association his support and knowledge. Opportunities are often neglected by druggists. Let this Association bring forth an annual opportunity by giving good and plenty of inducements for the retail druggist to attend this meeting.

The program should be in the hands of every member or druggist three months before the meeting. Fun, entertainments and amusements are not to be improved upon; they have been interesting, pleasant, pleasing and practical. We believe that it is the duty of this Association, at the annual election, to see that the selection of officers shall be distributed throughout the state as nearly as possible. (I do not intimate that such has not been done in the past.) A fair distribution of honors prompts harmony. Furthermore I believe your meetings should be distributed throughout the state, and not confined to one section. This will increase membership. No pharmaceutical association can live and prosper without support from the retail druggist. He must live and let live. He must pay his dues promptly. He must lend his assistance by being present at the meetings. He must make use of his brain power, by taking part in the proceedings. Attendance gives him a vacation which is necessary to health and business, as well as the brain.

Now, gentlemen, these are some of the arguments that might be presented to the three or four thousand druggists, who do not lend their influence or aid, nor their presence at your annual meeting.

HOW CAN THE ILLINOIS PHARMACEUTICAL ASSOCIATION BE MADE MORE USEFUL TO THE RETAIL DRUGGIST AND HOW CAN THE RETAIL DRUGGIST BE PERSUADED TO GIVE IT HIS SUPPORT?

BY OTTO E. F. BRUDER.

A proper answer to the first part of this question, will necessarily be a correct answer to the second part, for if the Retail Druggist sees that the I. Ph. A. is doing him some good, he will certainly give it his support.

Our Association can be made useful only by means of educational methods, applied practically through its State Board of Pharmacy, and naturally by the resultant change in the laws, as outlined below:—

To make a right beginning in educational matters, we must begin with the apprentice. No one should ever be allowed to come before the State Board of Pharmacy who has not served a full three-years' apprenticeship and this apprentice should have a high school education. The employer need not take this "high school education" too literally, he can take the boy while he is still young, 15 or 16 years old, when he is pliable and before any habits become firmly fixed, and while he is still attending school. He can come mornings and evenings and be broke in gradually, and when he is through high school, then begin his 3-years training in earnest. An

employer has no right to take a boy's education away from him by putting him in the store when he still has school lessons to learn, he will be handicapped forever after, and as you are trying to better pharmacy in every possible way, it would be wrong for you to begin by using poor material. Let the boy understand that he is learning a profession and don't attempt to fit him out for a messenger boy or porter. Do not let him consider his salary the important thing, but rather one of secondary importance; neither let him consider the diploma nor the registration certificate the important thing, and especially must you carefully shield him from getting knowledge of any mushroom schools of pharmacy, or similar institutions, that he may not get the idea in his head of attending one of these "easy schools," become "crammed" full of "knowledge"? pass the board while the knowledge is still fresh, and make it his sole aim and ambition to get a diploma and certificate of registration. Make him feel and study in such a manner that the securing of these valuable certificates becomes a natural gift to him, and as a reward for his studies and application of knowledge. Then when he does secure these papers, they will mean something. Start him on wages or salary according to your own ideas, whether it is nothing or \$50, the first year; but whatever it is, make an advance regularly as he improves, and make his progress and acquisition of knowledge a basis for the advance. You must manage this increase of salary in such a manner that he may realize that he is no cheap apprentice, and that his knowledge must bring him his bread and butter, as much and more so, than his goods. You will then have started the young man right, he will be no cheap clerk, and he will be no cheap competitor, and with no cheap clerks, you will have fewer competitors, and a general advancement in pharmacy will take place. When your boy's 3 years of apprenticeship are over, he will have a natural desire to attend a college of pharmacy, and you must encourage this and do everything in your power to make it possible.

The board being satisfied that the candidate has a high school education, is a good embryo three-year druggist, it should further insist upon that candidate's producing a diploma from a high-grade school of pharmacy, and every employer should see to it that his apprentice goes to college, in fact he should go to some trouble to pick out a good one for his protege.

Then when this candidate comes before the Board, he will have no need to stuff himself with "Quiz-Compend's"—"Cut and dried questions and answers on Pharmacy"—"How to pass the State Board," etc.—he will be an intelligent druggist, an honest business man, and he will pass the examination without an hour's extra preparation for it.

Pharmacy to-day and Pharmacy of the future has neither need nor use for the druggist who gets into the profession, by "stuffing" his way into it.

When all is said and done, it depends upon the State Board of Pharmacy as to who shall enter Pharmacy's doors, and so it is but just and proper.

But have we, the druggists of this State, given the Board sufficient power to deal with this most momentous question? No, we have not, but we can and must.

The Board of Pharmacy is closest to the druggist at present, because all its members are and ought to be, operative retail druggists, and hence are the first to know what is needed. The members of the Board should be the first to recognize the fact that better material is needed in drug stores, and such recognition is virtually taking place at present, as is seen in the action of some Boards by first examining applicants for their primary educational qualifications, which, if not highly satisfactory, will debar them from the Pharmacist's examination proper. This is well and just, and should be still further supplemented by requiring the applicant to prove a good moral character, or at least the retaining of his certificate (if he is successful in getting it) should depend upon his future good moral character. This will do away with numerous registrations, and as we already have too many, it will certainly prove beneficial; for it stands to reason that we have too many drug stores, according to population, and owing to the fact that very many are run by men who ought never to have been registered, competition is not fair, and necessarily the standard of Pharmacy is also considerably lowered.

Many will say that it should be necessary to make laws to regulate these things and to have police inspection, etc., but this is not proper, nor just, nor necessary. We need no outside police protection, and should not call upon the law to remedy our evils until absolutely necessary. The Pharmacists have made Pharmacy what it is, so let them make it what it should be. Let the Pharmacy Board take the initiative in this matter, let them be our watchful police force, and let us help them with our suggestions and our money, and we will soon rid our ranks of everything but proper material.

Another far-reaching effect which the State Board will exert by insisting upon proper and higher educational requirements for their candidates, will be a corresponding betterment of all matriculation requirements in second-hand colleges, or on the other hand it will put them "out of business."

Another great blessing will be the "death-blow," that numerous quiz courses, quiz compends, etc., will receive, for when a Board of Pharmacy examines in intellect, character, knowledge and practical work, the "quiz applicant" has no show whatever.

Now druggists tell your State Board what you want, your reason for wanting it, and see if you don't get it. But you must get busy. You and you alone have the power to make the State Board give you better druggists and you and you alone have the power to force upon all colleges of pharmacy the broader and sounder educational methods. It is up to you, Mr. Druggist, will you use your power?

A very peculiar state of affairs exists in our Pharmacy laws, in regard to the duty of assistant pharmacist and full registered pharmacist; as every druggist of over 10 years' experience knows, an assistant pharmacist as at present found with 3, 4 and 5 years' experience, is not fit to "run" any pharmacy, but we do find assistants in sole charge for weeks and months at a time. These things hurt pharmacy in general, and each employer's own business in particular, and probably the only reason for it is the prevailing short-sighted one of money—"to save money." This creates a demand for cheap help, and its natural result, cheap work. The State Board should be given the power and the adequate means to stop this reckless violation, and also to make the term of service for an assistant longer than at present, before he is allowed to become full registered and the owner or manager of a store. It should be made absolutely impossible for any one but a full registered pharmacist, and one with no less than 8 years' experience to become the owner or manager of a pharmacy. In no other way can we give the public the service which is demanded from us as Pharmacists.

We have ruinous competition from dry goods and department stores, mail order houses, general stores, and from peddlers, and in connection with these it may be well to call attention to the fact that in nearly all State Pharmacy laws there is a clause which provides "that nothing in this act shall apply to the sale of proprietary or patent medicines." Remove this clause, druggists; you put it there with the help of the proprietary medicine manufacturers, it is mischievous, very unjust, most inconsistent, and even dangerous. The right to sell medicine at retail must be restricted to the registered pharmacist.

Now, Mr. Retail Druggist, for once and always, get off the fence, one side or the other, and organize, and associate yourself with the members of this Association. You know the great good that has been accomplished by organizations, but where is your pride? You are virtually a coward, for others are fighting your battles for you. Some of these battles have been won, owing to the Association's stubborn aggressiveness and pluck; others have been lost, important ones, too, owing to your inaction and cowardice. When you realize that all these battles have been fought against the greedy manufacturer, the pirate, the cutter, the unfair and manufacturing wholesale druggist, the unqualified cheap dispenser, the department store octopus, the free dispensary evil, the fool and graft-seeking legislators, the saloon druggist, the traffickers in cocaine, morphine, etc., and fought in most cases by less than 5 per cent of our total numbers, don't it make you feel like taking off your coat and pitching in and helping to fight?

Money talks—let yours talk for your own good—and may the good cause hasten the day when you will advocate larger yearly dues.

You are in a grand profession, for pharmacy has a most rosy outlook in the future, but it needs men to keep it clean and money to fight its battles.

Don't be afraid that your money will be used to fatten some grafter's pocketbook; it won't be, for the officers and present members of our Association are too eager to make every dollar do more than 100 cents worth of actual good.

The Board of Pharmacy presented the following report:

REPORT OF THE BOARD OF PHARMACY.

To the President and Members of the Illinois Pharmaceutical Association:

The financial transactions of the year 1905 have already been fully laid before you in the comprehensive report of the Committee on Board of Pharmacy records and there remains for us to report only some general observations.

REGISTERED PHARMACISTS.

During the year 5,150 registered pharmacist certificates were issued. Of this number 4,902 were renewals and re-admissions, 246 were issued to applicants who passed successful examinations during the year and 2 were changes of locality certificates.

Our records show that 326 of these certificates were issued to non-residents of Illinois.

This does not necessarily mean that the remaining 4,824 registered pharmacists were actively engaged in their profession in Illinois during the year just closed. A large number of them have retired from active life, others are engaged in wholly different lines of business and still others are practicing physicians. They may never again want to embark in the business of pharmacy, but nevertheless are interested in it and keep their registration alive from year to year.

ASSISTANT PHARMACISTS.

The number of assistant pharmacist certificates issued during the year was 893. The number issued for renewals and re-admissions was 750, and 143 were admitted by examination. Of the total number of certificates, 63 were issued to non-residents.

A study of the reports of this board for the last four years will show that during that time there has been a gradual increase from year to year in the number of registered pharmacist certificates issued and a corresponding decrease in the number of certificates issued to assistant pharmacists.

In this connection the following table will be of interest:

	Registered Pharmacists certificates issued.	Assistant Pharmacists certificates issued.
1902.....	4,818	1,089
1903.....	4,942	1,020
1904.....	5,071	963
1905.....	5,150	893

The number of applications filed for examination as registered pharmacist and assistant pharmacist during these four years was as follows:

In 1902, 509; in 1903, 551; in 1904, 485; in 1905, 510.

APPRENTICES.

The number of apprentice certificates issued to successful candidates during the year was 531. This unusually large number is partially due to the vast amount of correspondence during the year with employers in regard to prompt registration of apprentices, but is largely due to the manner in which apprentice examinations are now conducted.

The board no longer requires an apprentice applicant to go beyond the borders of his county to take the examination. The questions are prepared by the board and sent to some reputable druggist or other person in the county seat of the applicant's home county, with the exception of Cook County, where the examinations are conducted by members of the board. The applicant is notified to appear before the druggist on a given date for his examination. The druggist gives the applicant desk room and such assistance in the way of explanation as he feels he can consistently and returns the papers to us for rating. This has been found by experience to work very satisfactorily, and at the same time it saves the applicant quite a good deal of expense.

EXAMINATIONS.

Eight meetings were held during the year for the examination of applicants for registered pharmacist and assistant pharmacist. Three of these were in Springfield in the months of January, May and October and five in Chicago in the months of February, April, July, September and November. The smallest number of applicants for examination at any meeting was at Springfield in October, when but twenty-six reported. The largest class during the year was at Chicago in February, when 137 were present.

The examinations are practical and are intended to thoroughly test the ability of the applicants. They consist of a preliminary test, chemistry, pharmacy, identification of drugs and preparations, dispensing and an oral quiz—six branches in all. The rating in all of these branches is upon the basis of 100, and a candidate must make 450 out of a possible 600 points in order to pass the examination. Under the rules of the board it is not necessary that an average of seventy-five be made in each branch, but a total of 450 points must be made.

The object of the preliminary examination is to test the general qualifications of the applicant. It consists of twenty questions in arithmetic, geography, history, percentage, profit and loss, etc. If a candidate is unable to make a rating of seventy-five in this preliminary test he is not permitted to take the examination in the other branches. The board has found by experience that it is a waste of time for the applicant and the

board to permit a candidate who cannot make seventy-five in the preliminary to proceed with the other branches.

Following the preliminary examination the applicant is given written work in chemistry and pharmacy. Ten questions are usually given in chemistry and twenty in pharmacy. He is then given ten samples of drugs and preparations to identify. In the identification the common name, official name, medical properties and doses are required to be given. The next branch is dispensing. Four prescriptions, such as are met with in the every day work of a pharmacist, are given the applicant to compound. In rating the dispensing, time, neatness of work and condition in which the prescription case is left are taken into consideration. The oral work, which is one of the most important branches, consists of reading prescriptions, doses and a sort of general review of the five other branches.

APPRENTICE EXAMINATIONS.

The questions given apprentice applicants are usually about the same as eighth grade work in the public schools. Our records show comparatively few failures in apprentice examinations outside of the city of Chicago. The major part of the failures in Chicago are attributed to the fact that the applicants are of foreign birth and have not had the advantages of an education in this country.

RENEWAL CARDS.

The cards sent out by the board to be returned with the remittances for the annual renewal of certificates for 1905 were a departure from the form heretofore in use. This form was adopted for the purpose mainly of getting reliable data as to the number of proprietors and the number of clerks in the State. On the card was a blank space for the pharmacist sending in his annual remittance to state whether he was a proprietor or a clerk. On the reverse side of the card, space was provided for the pharmacist renewing, in case he was a proprietor, to write in the names of the registered pharmacists in his employ, the names of the assistant pharmacists, the names of apprentices and the names of unregistered employees.

It was found as the cards came in that a large number of the registered pharmacists in the State were not following the instructions in regard to filling them out. To every person who failed to make out his card properly another card was sent, together with a letter of explanation and a further request for the desired information. In the main, the answers to our second requests were quite as satisfactory as could reasonably be expected for the first year of the departure.

Many, however, failed to respond in any way to the letters from our office and the data thus far obtained as to the number of proprietors and the number of clerks in the State is not full enough to warrant us in publishing it. We shall continue this inquiry this year and believe we will get reliable statistics for the entire State.

ANTI-NARCOTIC LEGISLATION.

The one thing pharmaceutical discussed at present by the daily press, the pulpit, juvenile court, reform school circles and well-meaning citizens, is the traffic in narcotics, or habit-producing drugs. As was pointed out by our committee on Complaints and Prosecutions in 1903, our present law is far from perfect, inasmuch as it embraces only cocaine, while no anti-narcotic law can be expected to result in efficient work unless it embraces all habit-producing drugs. It cannot be repeated too often and too plainly that this legislation should be framed by druggists, not only to avoid unnecessary hardship but as evidence that the large majority of druggists are reputable citizens, deploring the inroad this narcotic curse has made and is bound to make unless curbed.

It goes without saying that no Board of Pharmacy in Illinois or any other state can do intelligent, comprehensive work, unless it has the solid backing of the majority of the intelligent, honest, active druggists in the State. If this is the case, if the rank and file of honest, decent pharmacy is back of the board and it makes enemies, they will be of the kind that Illinois pharmacy and the board may be proud of. We have in Chicago a few obstinate, chronic, aggressive violators of the present cocaine law, but their faces are not seen and their voices not heard when honest pharmacists meet in local and State associations. In fact the arch sinner has been expelled by the Chicago local association, and another close second had his certificate revoked.

PRE-REQUISITE LEGISLATION.

The pharmacy act needs attention. In cities and in the country the trust method of collective or co-operative action is exhibiting itself and the individual is doomed unless he retains his individuality, and there is no better way to attain this individuality than professional attainment and perfection. The question for Illinois pharmacists to settle is briefly this—How can we attain this? That it must be attained is hardly at issue. Shall we so change the law as to require a high school certificate, or a certificate of one year of high school for admission to apprentice examination? Shall we lower the examination for assistants, so as to give relief to the crying need for help, and shall we make the examinations for full registration harder by requiring a college diploma? If this latter be decreed, what college shall be fit to figure as a college? Some schools of pharmacy are schools, while others with equally high sounding names and titles, are frauds, fakes and impositions, and the possession of a diploma per se means no more for the intellectual calibre of the possessor than his height or the weight gives any clew whatever to his makeup of professional attainment.

REVOCATION OF CERTIFICATES.

From personal correspondence and from reports in trade journals, one is

led to believe that dissipation and the use of narcotics among pharmacists is almost a general thing. Our records show but few revocations of certificates on that ground. It is, or ought to be well known, that dissipation is legal ground for loss of certificates. We feel that this cry about drunken pharmacists is injurious to our cause and not well taken. Why the few established cases? This public hue and cry should either be stopped, or cases proven up, for on the establishment of proof this board has never hesitated to act promptly. Think twice, fellow druggists, before you injure your own calling by casting reflections on the craft, but if the individual case is beyond question, send in your affidavits. A few revocations on that score will be a great bracer for the weaklings to correct their habits.

The members of the I. Ph. A. will be interested to know that a number of important cases are in the Superior Court on appeal, and that decisions are expected early in August. The Brendecke cases, involving the Central Pharmacy, its officers and clerks, are up for appeal on the constitutionality of the law, and, by agreement, as one test case is decided, the other cases will accept the decision.

The attorneys for Siegel & Cooper have raised the question that there is no adulteration if the defendants can show that they neither added nor detracted from the product offered for sale, while we claim that a product must conform to the standards laid down by the United States Pharmacopœia.

The decisions on the foregoing cases will be of vital importance not only to the incoming legislative committee of your Association but also to the entire drug trade of the state and the country.

Respectfully submitted,

M. C. METZGER,
President.

J. F. SHREVE,
Vice President and Treasurer.

WILHELM BODEMANN,

BERNARD SCHWARTZ,

WM. A. DYCHE,

State Board of Pharmacy.

F. C. DODDS, *Secretary.*

At 1:00 o'clock the Association adjourned to meet at 2:30 p. m.

THIRD SESSION.

The Association reconvened at 2:30 p. m. Wednesday.

PRESIDENT GARVER—At this morning's session the report of the committee on legislation was made a special order for this hour. We are now ready to hear this report by Mr. Avery.

REPORT OF THE LEGISLATIVE COMMITTEE.

To the President and Members of the Illinois Pharmaceutical Association:

Your committee on legislation begs leave to submit the following report:

Inasmuch as there has been no session of our State Legislature since our last meeting, we have no new enactments by our own state to consider. Our attention has been called, however, to many laws of interest to us which have been presented to legislatures of other states, showing a widespread interest in the subject of greater legal control in the sale of drugs and poisons.

The great similarity in these bills points to an inspiration from the same general source, and the fact that nearly all have failed of passage would indicate that the bills were either faulty or too drastic, evidence that in working an enduring reform a greater degree of accomplishment may be obtained by conservative demands. In general, legislation has been sought in the restriction of sales of narcotics, poisons, and habit-forming drugs.

In New York the notorious Stevens-Wainwright bill was exceedingly obnoxious to the druggists of that state. It not only embodied a "formula on the bottle" provision, but vested the power of enforcement upon local boards of health, instead of the State Board of Pharmacy.

The bill failed of passage. A similar bill was also defeated in New Jersey.

A pre-requisite law failed of passage in the District of Columbia, also in Ohio.

Massachusetts passed a law providing for exchange of certificate by the board of pharmacy with other states. Ohio did likewise, based, however, on grounds of reciprocity, only exchanging from such states as confer like favors to holders of Ohio certificates.

Anti-narcotic laws were passed in Massachusetts and District of Columbia, the draft of which were in conformity with the one recommended by your committee—the Chicago Conference law.

Maryland also passed an anti-narcotic law.

Two bills of considerable import were presented to Congress at the present session.

The Denaturized Alcohol bill having become a law, this gives the commissioner of Internal Revenue power to establish regulations for the withdrawal of domestic alcohol from bond, tax free, when rendered unfit for beverage or liquid medicinal uses, by mixture with suitable denaturing materials.

The Pure Food bill, as originally introduced, afforded little protection to pharmacists from its sweeping provisions. Our National Committee secured valuable amendments, exempting preparations the formulas of which were contained in the Pharmacopœia or National Formulary.

Your Committee would refer to two recommendations made in the Committee's report of last year, and urge direct action upon them at this time.

First: That the ordinance governing the sale of carbolic acid in the city of Chicago be incorporated into the state poison law.

Second: In view of the many important duties which will be delegated to your Committee this next year, we recommend that a proper appropriation be made by this Association to defray the legitimate expenses of the Committee.

CHAS. THAYER,
CHAS. H. AVERY,
A. D. LOAR,
E. W. ARMSTRONG,
T. C. LOEHR,

Committee.

REPORT OF THE SPECIAL COMMITTEE ON LEGISLATION.

To the President and Members of the Illinois Pharmaceutical Association:

At the last annual meeting of the Illinois Pharmaceutical Association the President was authorized to appoint a special committee on legislation, three from the city of Chicago, and three from the outlying portions of the State, to prepare and submit to the annual meeting of the Association to be held in 1906, a draft of a bill for the regulation of the sales of narcotics or habit-producing drugs.

At a meeting of the executive committee of the Association in November last, this special committee was instructed, in case it saw fit, to recommend changes in the present pharmacy law.

Your committee, acting under the above instructions, has the honor to make the following report:

We submit the following draft of a bill in regard to the sale of certain narcotic drugs. In submitting this, we do not want to be understood as recommending this form of bill to the exclusion of other bills upon the same subject. We do not claim that it is perfect, but we think it will serve as a firm foundation upon which to build a proper law upon this subject.

A BILL

TO PROVIDE AGAINST THE EVILS RESULTING FROM THE TRAFFIC IN CERTAIN NARCOTIC DRUGS, AND TO REGULATE THE SALE THEREOF.

SECTION 1. *Be it enacted by the People of the State of Illinois represented in the General Assembly:*

That it shall be unlawful for any person, firm or corporation to sell, furnish or give away any cocaine, alpha or beta eucaine, opium, morphine, codeine, heroin, chloral hydrate or any salt or compound of any of the foregoing substances, or any preparation or compound containing any of the

foregoing substances, or their salts or compounds, except upon the original written order or prescription of a lawfully authorized practitioner of medicine, dentistry or veterinary medicine, which order or prescription shall be dated and shall bear the name of the person for whom prescribed, or if ordered by a practitioner of veterinary medicine, shall state the kind of animal for which ordered, and shall be signed by the person giving the prescription or order. Such written order or prescription shall be permanently retained on file by the person, firm or corporation who shall compound or dispense the articles ordered or prescribed, and it shall not be again compounded or dispensed, except upon the written order of the original prescriber for each and every subsequent compounding or dispensing. No copy or duplicate of such written order or prescription shall be made or delivered to any person, but the original shall at all times be open to inspection by the prescriber and properly authorized officers of the law.

Provided, however, that the above provision shall not apply to preparations containing not more than two grains of opium or not more than one-fourth grain of morphine, or not more than one-fourth grain of heroin, or not more than ten grains of chloral hydrate, in one fluid-ounce, or if a solid preparation, in one avoirdupois ounce. Provided also that the above provisions shall not apply to preparations containing opium and recommended and sold in good faith for diarrhoea and cholera, each bottle or package of which is accompanied by specific directions for use, and a caution against habitual use, nor to powder of ipecac and opium commonly known as Dover's Powder, nor to liniments or ointments when plainly labeled "for external use only." And provided further that the above provision shall not apply to sales at wholesale by jobbers, wholesalers and manufacturers to retail druggists or qualified physicians, or to each other, nor to sales at retail by retail druggists to regular practitioners of medicine, dentistry or veterinary medicine, nor to sales made to manufacturers of proprietary or pharmaceutical preparations for use in the manufacture of such preparations, nor to sales to hospitals, colleges, scientific or public institutions.

SEC. 2. It shall be unlawful for any practitioner of medicine, dentistry or veterinary medicine to furnish to or to prescribe for the use of any habitual user of the same any cocaine, heroin, alpha or beta eucaine, opium, morphine, chloral hydrate, or any salt or compound of any of the foregoing substances, or any preparation containing any of the foregoing substances or their salts or compounds. And it shall also be unlawful for any practitioner of dentistry to prescribe any of the foregoing substances for any person not under his treatment in the regular practice of his profession, or for any practitioner of veterinary medicine to prescribe any of the foregoing substances for the use of any human being.

Provided, however, that the provisions of this section shall not be con-

strued to prevent any lawfully authorized practitioner of medicine from furnishing or prescribing in good faith for the use of any habitual user of narcotic drugs who is under his professional care, such substances as he may deem necessary for their treatment, when such prescriptions are not given or substances furnished for the purpose of evading the provisions of this act.

SEC. 3. Any person who shall violate any of the provisions of this act shall be deemed guilty of a misdemeanor, and upon conviction, for the first offense shall be fined not less than \$25.00 nor more than \$50.00, and upon conviction for a second offense shall be fined not less than \$50.00 nor more than \$100.00, and upon conviction for a subsequent offense shall be fined not less than \$100.00 nor more than \$200.00, and shall be imprisoned in the county jail for not more than six months, and if a licensed pharmacist, physician, dentist or veterinary surgeon, his license shall be revoked. It shall be the duty under this act of all judges of the courts of common pleas in this State, at every regular term thereof, to charge all regularly impaneled grand juries to diligently inquire into and investigate all cases of the violation of the provisions of this act and to make a true presentment of all persons guilty of such violations. It shall be the duty of the Board of Pharmacy to cause the prosecution of all persons violating the provisions of this act. No prosecution shall be brought for the sale of any patent or proprietary medicine containing any of the drugs or preparations hereinbefore mentioned until the Board of Pharmacy shall certify that such medicine contains any of the said drugs or preparations in excess of the maximum percentages hereinbefore mentioned.

SEC. 4. In any proceedings under the provisions of this act the charge may be brought against any or all of the members of a partnership, or against the directors or executive officers of a corporation, or against the agent or any person, partnership or corporation.

SEC. 5. All laws and parts of laws in conflict with this act are hereby repealed.

Your committee offers the following suggestions for amendments to the present pharmacy law:

The title of the act makes provision for an appropriation. Inasmuch as the State makes no appropriation whatever for the Board of Pharmacy, should the title of the act be amended by striking out the reference to an appropriation?

Section 5 provides for registration on "Time Service." This section of the law is very misleading. Should it be stricken out entirely?

Section 6 provides that "Time of attendance at any recognized school of pharmacy shall be accredited" on the time required of applicants for assistant pharmacist. Should this time of college attendance be limited

to one year only and should it also be allowed in applications for Registered Pharmacists?

This section also refers to a "recognized school of pharmacy." What constitutes a "recognized school of pharmacy?"

Section 7 says: "It shall be the duty of Registered Pharmacists who take into their employ an apprentice for the purpose of being a pharmacist, to require said applicant to at once apply to said Board of Pharmacy for registration as apprentice. . . . and the date of experience required of applicants for Assistant Pharmacist or Registered Pharmacist shall be computed from the date of registration as apprentice." Should this section provide a penalty for a Registered Pharmacist who fails to require an apprentice to make application for registration?

Section 8 is somewhat ambiguous upon the subject of annual renewal fees. Should a provision be inserted to the effect that if the annual renewal fee is not paid by April 1 of each year, the only way the holder of a certificate can be reinstated is by examination? Or would it be better to amend this section so as to provide that the renewal fee after April 1 of each year shall be double the regular renewal fee? Or would it be still better to provide a penalty for every registered pharmacist actively engaged in the business who does not renew his certificate by April 1 of each year?

This section is also ambiguous as to the right of an Assistant Pharmacist to renew his registration after having permitted it to lapse one year. Should not this be made more clear and also should not the same provision be inserted in regard to annual renewal fees as is suggested for Registered Pharmacists?

Section 12 may be construed to mean that it is not necessary to put a label on physicians' prescriptions. Should not this section state plainly that the label of the dispensing pharmacist should be placed upon prescriptions?

Section 14 is not clear upon the subject of adulteration. Defendants in suits instituted by the Board of Pharmacy claim that if nothing is added or no alteration made that there is no violation of this section. Would it not be better to eliminate this ambiguity and insert a plain provision to the effect that all preparations must conform to the U. S. P. standard?

The penalty for the first violation of this section is a fine of not less than fifty dollars nor more than one hundred dollars. Inasmuch as this high fine is responsible for a good many acquittals in jury trials, would it not be better to provide for a less fine for first offenses?

This section provides that "The latest edition of the United States Pharmacopœia is hereby adopted as the standard in determining the recognized tests of identity and purity under this act." This means that the U. S. P. in force at the time of the taking effect of the act is adopted as the standard. Is it not possible to amend this particular clause so that its

meaning may be more elastic and be made to apply to whatever edition of the U. S. P. is in force and effect at the time?

Is it not possible also to include in the text the National Formulary and other recognized text books?

What about tests for such preparations as standard elixirs, etc?

Section 14a is construed by some to mean that a proprietor is not liable for the acts of his employees. Should it not be changed so as to make it unlawful "for any person to retail or sell or give away any cocaine hydrochlorate, or any salts of or any compound of cocaine, or any preparation containing cocaine, or any salts of or any compound thereof, excepting upon the written prescription of a licensed physician or licensed dentist, licensed under the laws of the State," etc.

Section 14b does not prohibit any person from giving away cocaine. Would it not be well to provide that no narcotics should be sold to others than registered retail pharmacists, colleges, licensed physicians, and veterinarians? Also should not jobbers be compelled to keep a register of sales of narcotics, which shall be accessible at all times for inspection by the State Board of Pharmacy?

Section 15 makes it the "duty of the state's attorney of the county where such offense is committed to prosecute all persons violating the provisions of this act upon proper complaint being made." Should not this section be changed so as to make it the duty of the Board of Pharmacy to prosecute?

Should the State be compelled to pay appeal fees?

The display of certificates and the name of the Registered Pharmacist in charge of a drug store are provided for in Section 8. Is not this provision out of place in this section and is it not liable to be confounded with the other provisions of that section?

Would it not be well to provide a separate section to cover this matter, and also to provide a penalty for any registered pharmacist who displays a certificate not rightfully belonging to him?

Would it not be well to provide for the sanitary inspection of drug stores by the Board of Pharmacy?

Your committee respectfully submits the above and foregoing suggestions for the consideration of the Association in annual meeting.

CHARLES A. THAYER, *Chairman*.
CHAS. H. AVERY,
A. D. LOAR,
E. W. ARMSTRONG,
T. C. LOEHR,

Committee.

The report of the special committee was then considered section by section.

PROF. OLDBERG—I would like to offer the following motion:

MOTION—That it is the consensus of opinion of this meeting that all Proprietary Medicines containing Morphine, Opium, Cocaine, Alpha and Beta Eucaïne or Chloral Hydrate, which are advertised to the public, should be labeled according to contents.

MR. WOOTEN—I must express surprise that there is no opposition in this matter. We all know the popular prejudice against the use of morphine. There is no corresponding prejudice against heroin because it is not so well known. There are very few expectorants put up by druggists that do not contain some form of opium. What effect is this going to have? Every bottle of cough medicine we are putting out should be considered. The mover of this motion has said nothing about putting on the poison labels. Are we to understand that there is nothing to go on this label except the poisons with our name?

MR. LOEHR—Prof. Oldberg's motion is not in harmony with an amendment I had in mind to Section 3. When this section is read I desire to offer an amendment which will take in and cover the motion made by Prof. Oldberg.

MR. LUEDER—I do not think it would be well to adopt any resolution now along this line. I move as an amendment that the motion be not considered at the present time.

MR. WELLS—There is some complaint that if we incorporate that in the bill it may defeat the entire bill. Let the draft stand as it is. If we are going to have a very strict statute against the sale of these things we should know what they contain. This ought to be made a law, but I think it should stand alone.

MR. LUEDER—I am opposed to adopting any resolution which has a bearing upon the report of this committee.

Prof. Oldberg's motion was then temporarily laid upon the table until Section 3 was read.

Mr. Avery then read Section 1 of the Anti-Narcotic bill down to the end of the first paragraph.

MR. FORSYTH—I would like to inquire why Heroin is mentioned and Codeine left out. I move that Codeine be inserted in line 3 of Section 1.

The motion was then carried without debate.

MR. BOEHM—I think that Section 1 should provide that the date shall be put on the prescription by the druggist exclusively. The physician may be in a hurry when he writes the prescription and may forget to put on the date. In such a case the druggist would have to run around and get the doctor to date the prescription before he could lawfully put it up. I offer an amendment to this effect.

The amendment was carried.

Mr. Avery then read the remainder of Section 1.

On motion of Mr. Forsyth "or not more than one-quarter grain of codeine" was inserted in the second paragraph following the word "heroin."

Mr. Avery then read Section 2.

On motion the word "known" was inserted after the word "any" and before the word "habitual," and the word "codeine" was inserted after the word "morphine" and before the word "chloral."

Mr. Avery then read Section 3.

Upon motion the words "and upon conviction for the second offense shall be fined not less than \$50.00 nor more than \$100.00" were stricken out.

Mr. LOEHR—I now desire to offer the following amendment of which I spoke a few minutes ago in connection with the motion offered by Prof. Oldberg:

Strike out all of the last part of Section 3, beginning with "No prosecution shall be brought," and insert the following:

"All preparations containing any cocaine, heroin, alpha or beta eucaine, opium, codeine, morphine, chloral hydrate or any salt or compound of any of the foregoing substances in excess of the amount mentioned in section numbered one shall have the formula printed on the label by the manufacturers."

The amendment offered by Mr. Loehr was adopted.

Mr. Avery then read Section 4 which was amended to provide that no pending litigation shall be affected by this act.

Section 4 as printed was made Section 5 and Section 5 as printed was made Section 6.

Upon motion of Mr. Forsyth the draft as amended was then adopted.

Mr. Avery then took up the proposed amendments to the pharmacy act, which were considered section by section.

Upon motion of Mr. Forsyth it was ordered that the title of the pharmacy act remain as it is at present.

It was ordered that Section 5 of the existing pharmacy law, which is the section in regard to registration on "time service," be eliminated from the proposed new draft.

A lively discussion occurred in connection with Sections 4 and 6

concerning the qualifications for registration; it was finally decided that applicants for registration as Assistant Pharmacist be allowed credit for one year's time upon furnishing certificates showing the successful completion of one year of school work in a recognized school of pharmacy and that applicants for Registered Pharmacist must be able to furnish proofs of five years drug store experience since apprentice registration, or three years drug store experience since apprentice registration and two school years of successfully completed work in a recognized school of pharmacy either before or after apprentice registration.

In regard to "recognized schools of pharmacy" it was determined that this be left to the discretion of the Board. It was also ordered that Section 4 of the present pharmacy law be amended by striking out the words "or physicians holding certificates from the State Board of Health."

In regard to Section 7 of the pharmacy law it was concluded that no penalty should be provided for employers who fail to have their apprentices registered.

After a spirited debate regarding the registration of apprentices and the requirements therefor, it was recommended that applicants for apprentice registration who are able to furnish certificates of having successfully completed 8th grade work in the public schools be exempt from the apprentice examination but that other candidates be required to pass the examination of the Board as heretofore.

It was decided that Section 8 should remain the same as it is at the present time.

It was ordered that a penalty should be provided in Section 14 to be not less than \$10 nor more than \$50.

In regard to Section 14 it was further decided that the U. S. P. which is in force and effect at the time of the investigation be made the standard and that the National Formulary also be recognized as a standard.

It was concluded that Sections 14a, 14b and 15 should stand as they are, and that the question of appeal fees be left to the Board of Pharmacy.

In regard to inspection of drug stores it was recommended that nothing be done in this respect.

The suggestion to include in the proposed new law the Chicago city ordinance in regard to the sale of carbolic acid and make it a state law was not accepted as it was evident that the conditions in country trade require different treatment from those of the city.

On motion of Mr. Avery it was ordered that the legislative committee refer to the next general assembly the repeal of what is known as the Abortifacient law.

MR. BODEMANN—I move you, Mr. President, that a vote of thanks be extended to the legislative committee.

The motion was unanimously carried.

MR. LUEDER—The next legislative committee will have a great deal of work to do if it follows up the recommendations of this meeting. I therefore move you, Mr. President, that not to exceed \$300 be placed at the disposal of the legislative committee for the purpose of carrying out our recommendations.

The motion was adopted without debate.

MR. AVERY—I recommend that the legislative committee be given a good deal of latitude in its efforts to secure the enactment of the laws which we have here suggested.

The recommendation was adopted.

MR. AVERY—I would like to say for the information of those present that I have just received the following telegram from the Illinois Central in regard to the N. A. R. D. meeting at Atlanta next October:

Chas. H. Avery, Care National Hotel, Peoria, Ill.

You may announce that a rate of one fare plus twenty-five cents has been authorized, Chicago to Atlanta and return for special train for party consisting of retail druggists, and that the official route from Chicago will be the Illinois Central in connection with the Nashville, Chattanooga and St. Louis Railway.

MR. WOOTEN—We should like very much indeed to have a large representation of Illinois pharmacists at the next meeting of the N. A. R. D. A movement is on foot to take a boat load from New York and Baltimore to Atlanta. Our eastern friends will be at the meeting with a very strong voting power and I hope that our western friends will be present in good number also.

PRESIDENT GARVER—I understand that the committee on resolutions is ready to report.

MR. LOEHR—The committee on resolutions recommends that the following resolution offered by Mr. Forsyth be adopted:

Resolution Offered by W. K. Forsyth.

WHEREAS, At the meeting of the Illinois Pharmaceutical Association held in Peoria, July, 1894, the Association provided for the organization of the United States Pharmacal Co., as a mutual or co-operative manufacturing pharmaceutical association owned, operated and controlled by retail pharmacists, and

WHEREAS, Said Company first offered its line of goods to the favor of the retail pharmacists of this state in the spring of 1896, ten years ago, and has been operated successfully and continuously since that time under the serial number and contract plan, and

WHEREAS, This Association has from time to time shown its interest in the success and welfare of the United States Pharmacal Co., and has on previous occasions endorsed it as the originator of the direct contract and serial number plan for maintaining retail prices; now therefore be it

Resolved, That this Association renew its pledges of support and approval of the United States Pharmacal Co., and recommend it to the hearty consideration of those pharmacists of this and adjoining states who at present do not handle its goods, with the assurance that the Company and its goods merit the support and approval of all pharmacists who are alive to the best interests and welfare of the profession, and

Resolved, That the first week of September, December, March and June of each year, be known by the pharmacists of Illinois as U. S. P. Co. week, and that further it be

Resolved, That during U. S. P. Co. week the pharmacists of this state give the goods of the U. S. Pharmacal Co., special advertising, special display in their stores, special window space, and in other ways extra and unusual prominence, with a view to increasing the sales on their goods, and further be it

Resolved, That a copy of this resolution be sent to every member of this Association with the request that they co-operate with each other in this effort.

The resolution was adopted without debate.

MR. LOEHR—The committee also recommends the adoption of the following resolution offered by Mr. Wooten:

Resolutions Offered by T. V. Wooten.

WHEREAS, The work of the National Association of Retail Druggists during the past eight years has been of such a character as to inspire con-

fidence in the justice of its aims and the practicability of its plans for further improving the financial condition of the retail drug trade, therefore, by the Illinois Pharmaceutical Association be it

Resolved, That this Association hereby reaffirms its loyalty to the National Association.

Resolved, That the Direct Contract and Serial Numbering plan put into operation by a number of proprietors is hereby heartily commended and all members of the Association are urged to give those manufacturers who have adopted this plan for the marketing of their preparations preferential consideration.

Resolved, That this Association believes that all proprietary manufacturers who have not as yet adopted the D. C. S. N. plan should do so without delay, because experience has proved it is the only plan that will prevent price cutting, and every proprietor who really values the friendship of the retail drug trade ought to show his appreciation in this practical way.

Resolved, That we cannot afford to pay more than \$2.00, \$4.00 and \$8.00 per dozen for proprietaries that sell at 25 cents, 50 cents and \$1.00, and that as a matter of justice we enthusiastically endorse the endeavors of the National Association to induce proprietors whose prices are wrong to come down to these figures.

Resolved, That the incoming officers are hereby directed to co-operate in every practical way with the officers and the local branches of the N. A. R. D. in order that all these bodies may work together in closest harmony to make the drug business a better paying investment for our capital and labor.

Resolved, That the incoming President of the Association is hereby directed to appoint delegates to represent the Illinois Pharmaceutical Association at the annual convention of the N. A. R. D. to be held in Atlanta, October 1-5, 1906.

The resolution was adopted without debate.

MR. LOEHR—The committee also recommends the adoption of the following resolution offered by Mr. Forsyth:

Resolutions Endorsing the Mann Bill.

WHEREAS, The patent laws of this country are so framed that a certain well-known foreign corporation has been permitted, by reason of the provisions of these laws, to market identically the same product in the United States at one dollar an ounce, that it markets in Germany at six cents an ounce, and in Canada at fifteen cents an ounce, and

WHEREAS, The only difference in the ounce package put out by this firm consists in the printing on the label which says in one case, "The resale and importation to the United States of America are prohibited," and in

the other case, "Manufactured for the United States patentee," proving conclusively that the people of the United States are being held up and literally robbed through the sale of important medicinal compounds under cover of our patent law, and

WHEREAS, The Mann Bill, which passed the House of Representatives at the last session of Congress, was designed to, and would correct this great injustice to the American people without in any way discouraging inventions in the useful arts and sciences, and is the measure that has been endorsed by the pharmacists of the country through their two great national organizations, the American Pharmaceutical Association and the National Association of Retail Druggists, as well as by the various state pharmaceutical associations; therefore, by the Illinois Pharmaceutical Association be it

Resolved, That we most heartily and unreservedly re-endorse the Mann Patent Bill, which is again pending in Congress as a measure demanded by justice, righteousness, and a decent respect for the interests and welfare of sick humanity in this great republic.

Resolved, That to Representative Mann, its author, is hereby extended a vote of thanks for his splendid efforts in piloting the bill through the last House, for his good work on its behalf in the Senate, and for his continued endeavors to secure its passage.

Resolved, That a copy of these resolutions be sent to the Congressmen and Senators from the state of Illinois in order that they may know that the Illinois Pharmaceutical Association is earnestly in favor of the passage of the Mann Bill at this session of Congress, to the end that it may receive the signature of the President, thus putting our beloved country in line with practically all of the enlightened countries of the world on the question of patent legislation as it relates to medicinal compounds.

The resolution was adopted without debate.

MR. LOEHR—The committee on resolutions also recommends the adoption of the following resolution introduced by Mr. Schaper:

Resolution Offered by H. F. Schaper.

WHEREAS, It was my pleasure and privilege to present a resolution regarding the Mann Bill at our last Convention: In that resolution, I set forth its origin, it having originated in Illinois, and other States have re-endorse that Bill. Our resolution of last year found an enthusiastic echo all over this country and was patterned after in several state conventions. Therefore, by the Illinois Pharmaceutical Association in session, be it

Resolved, That we again most emphatically endorse the Mann Bill, modified or otherwise, so long as the bill curbs the infamous iniquities of the

present, permitting foreigners to take out patents in our country that our citizens cannot take out in foreign countries.

The resolution was adopted.

MR. LOEHR—The committee on resolutions, in view of the action taken here today in regard to requirements for registration, recommends that the following resolution offered by Prof. Day be received, printed in the proceedings of this meeting, and referred to the committee on legislation:

Resolutions Adopted by the Chicago Branch of the American Pharmaceutical Association at its Regular Meeting, June 12, 1906.

WHEREAS, The only distinguishing characteristic of the pharmacist's vocation is his professional work, and

WHEREAS, The rights of the public as well as the prosperity of the pharmacist demand that proper pharmaceutical education be effectively fostered and the admission of educationally unfit persons to the apothecary's business prevented, and

WHEREAS, Examinations cannot take the place of systematic education, and

WHEREAS, These truths are now given practical recognition in several States as follows: in Michigan a preliminary education amounting to two years of high school work is required of candidates for license as registered pharmacists; in New York, Ohio, South Dakota, and Wisconsin one year of high school work is required. In New York and Pennsylvania candidates for license must also be graduates of a recognized school of pharmacy; and in Wisconsin applicants for certificates as registered pharmacist must have a technical education amounting to two years of not less than thirty-two weeks' instruction annually in a recognized school of pharmacy, and

WHEREAS, Our great State of Illinois should not be permitted to fall behind other States in necessary educational reform, therefore, be it

Resolved, By the Chicago Branch of the American Pharmaceutical Association that the preliminary general education required for apprentices in pharmacy under Section 7 of the Pharmacy Law should be not less than one year of high school work or its equivalent and we request the Board of Pharmacy of Illinois to so order under the ample authority conferred upon it by said Section, and be it further

Resolved, That the Board of Pharmacy of our State be and is hereby requested to accept the standards, of efficiency of the American Conference of Pharmaceutical Faculties as applying to all schools of pharmacy to whose students and graduates any credit is extended in any form under the pharmacy law, and that no credit be extended for courses of study in any schools not conforming to such standards, and be it further

Resolved, That the Board be and is hereby requested to make the scope

of the examinations for the licensing of registered pharmacists commensurate with the courses of education given in schools of pharmacy registered by the Board as conforming to its standards of efficiency, and be it further

Resolved, That we request the Board of Pharmacy of Illinois to take into account all direct evidence of effective training for the practice of pharmacy which any candidate may present in his behalf, and especially satisfactorily completed courses of study and laboratory practice in schools of pharmacy, in the determination of his fitness for registration and license, and be it further

Resolved, That the pharmacy law of Illinois should be so amended as to require two years practical experience in pharmacies independently of courses of study, but to the end that substantial courses in the pharmaceutical schools may not be discouraged, the laws and Board rulings should not require persons who take longer courses to wait a correspondingly longer time before they are enabled to secure their licenses; and that the minimum total time prescribed for both college education and practical experience in pharmacies should be the same for all persons without reference to the length of the college courses they may have completed, and should be sufficient to include a full two years' course in a pharmaceutical school.

MR. LOEHR—Also that the resolution offered by Mr. Mathison take the same course.

Resolution Offered by Soren Mathison.

TO PREVENT the great number of deaths and accidents continually occurring from the careless handling and the selling of poisons by unqualified persons, the effect of which poisons they are almost, if not entirely, ignorant, and their patrons, if possible, more ignorant, be it

Resolved, By the I. P. A., that the sales of poisons of every kind to the laity be restricted to the retail druggists who alone are qualified to handle the same.

MR. BARTELLS—I desire to offer the following resolution and move its adoption without reference to the committee on resolutions.

PRESIDENT GARVER—If there is no objection we will consider the resolution now.

MR. BARTELLS—The resolution is as follows:

Resolved, That the members of the Illinois Pharmaceutical Association extend their sincere sympathy to Mr. Albert E. Ebert in the loss of his wife—his companion and helpmate of a lifetime.

The resolution was unanimously adopted by a rising vote.

PRESIDENT GARVER—We will now hear the report of the Secretary on the voting cards for 1906.

REPORT OF SECRETARY ON VOTE OF THE REGISTERED
PHARMACISTS OF THE STATE FOR NOMINEES TO THE
GOVERNOR FOR APPOINTMENT ON THE STATE BOARD
OF PHARMACY.

Congressional Districts 1 to

10 inclusive.....	W. H. Brown, Chicago	290
	John Conrad, Chicago	205
	P. E. Finninger, Chicago	111
	William Krizan, Chicago	124
	E. H. Ladish, Chicago	125
	I. F. Quales, Chicago	195
	H. F. W. Spilver, Chicago	119
	John Stuchlik, Chicago	149
	James H. Wells, Chicago	257
	G. P. Mills, Evanston	250
11th Congressional District....	A. L. Brooks, DeKalb	181
12th Congressional District....	J. H. Keeling, Rockford	271
13th Congressional District....	Charles P. Guenther, Freeport	202
14th Congressional District....	August Heimbeck, Rock Island	190
15th Congressional District....	A. B. Clark, Galesburg	290
16th Congressional District....	Robert D. McDougal, Peoria	269
17th Congressional District....	G. F. Lester, Arrowsmith	188
18th Congressional District....	F. E. Kespler, Georgetown	75
19th Congressional District....	Harry D. Oldham, Urbana	406
20th Congressional District....	C. H. Harder, Pittsfield	125
21st Congressional District....	J. Frisch, Springfield	285
22nd Congressional District....	Thomas Knoebel, E. St. Louis	386
23rd Congressional District....	L. H. Broom, Effingham	207
24th Congressional District....	H. J. Humma, Metropolis	100
25th Congressional District....	M. C. Metzger, Cairo.....	650

On motion of Mr. Loehr the three receiving the highest vote, Mr. M. C. Metzger, of Cairo, Harry D. Oldham, of Urbana, and Thomas Knoebel, of E. St. Louis, were recommended to the Governor from which to make an appointment on the Board of Pharmacy to succeed Mr. M. C. Metzger, whose term of office will expire December 30, 1906.

SECRETARY DODDS—The vote for appointment on the Advisory Committee is as follows:

REPORT OF SECRETARY ON VOTE OF REGISTERED PHARMACISTS FOR NOMINEES TO THE UNIVERSITY OF ILLINOIS FOR APPOINTMENT ON THE ADVISORY COMMITTEE, DEPARTMENT OF PHARMACY.

Congressional Districts, 1

to 10, inclusive.....	Frank Ahlborn, Chicago	205
	John J. Boehm, Chicago	235
	H. N. Bruun, Chicago	170
	V. H. Chantler, Chicago	128
	F. E. Falkenberg, Chicago	290
	J. E. Grubb, Chicago	168
	L. P. Larsen, Chicago	202
	R. E. Rhode, Chicago	280
	Charles F. Rice, Chicago	245
	W. C. Scupham, Chicago	204
11th Congressional District....	H. J. Baumann, Dundee	135
12th Congressional District....	W. D. Duncan, Ottawa	325
13th Congressional District....	John D. Covell, Forrester	75
14th Congressional District....	M. Brewer, Monmouth	195
15th Congressional District....	Henry J. Losch, Kewanee	178
16th Congressional District....	William H. Mead, Chillicothe	163
17th Congressional District....	Harry W. Giese, Bloomington	316
18th Congressional District....	T. S. Arnold, Watseka	171
19th Congressional District....	George M. Bennett, Urbana	302
20th Congressional District....	Charles DuHadway, Jerseyville	112
21st Congressional District....	W. O. Steinmeyer, Carlinville	231
22nd Congressional District....	W. D. Harnist, Edwardsville	136
23rd Congressional District....	William Bower, Olney	305
24th Congressional District....	N. E. Prince, Enfield	131
25th Congressional District....	George H. Wood, Mounds	247

On motion of Mr. Forsyth the four receiving the highest vote, namely, W. D. Duncan, of Ottawa, William Bower, of Olney, Harry W. Giese, of Bloomington, and George M. Bennet, Urbana, were recommended to the University of Illinois from which to select a successor to the outgoing member in July, 1906.

PRESIDENT GARVER—The chair is informed that Mr. F. C. Bourscheidt, an ex-president of this association is present. I am quite sure all of us would be glad to hear from him.

MR. BOURSCHIEDT—I think it is hardly fair to take up your time, but I have been requested to say a few words in regard to the birth of this Association. I was present on that occasion.

In 1872 this state tried to get a pharmacy law and failed. The druggists made another effort in 1878 and again failed. Why? Because seventy-five per cent of the druggists of the state were opposed to that law. They did not understand the reasons for it. We found it absolutely impossible to pass any legislation without having some backing. Consequently, in 1879 a few of us got together in Bloomington and circulated a petition for an organization in this state. There was a committee appointed at that time, consisting of Mr. Buck of Chicago, Mr. Marmon of Bloomington, Mr. Greenbaum of La Salle, Mr. Fleury of Springfield and myself.

We talked the matter over and a committee was appointed to draft the constitution and by-laws.

Our first general meeting was in Springfield in December, 1880. At that time I was a member of the committee on constitution and by laws. We then drafted the first pharmacy law. At that time only five states in the union had such a law and we got in as the sixth. I am glad to see that Illinois has always been in the lead.

Mr. Engelhard was then the leading spirit among the members of the legislature. He, Mr. Buck and myself were on the committee to draft the first bill.

We had no money and it cost these men almost \$1,000 which was made up by voluntary contributions from all parts of the state. Mr. Marmon was elected as the first president in 1880. I was honored with the presidency the next year, and presided at the meeting in Chicago in 1882. It seems like old times to hear you discussing these matters.

I am glad to be with you and hope you will prosper and grow.

PRESIDENT GARVER—Mr. Otto E. Bruder has a paper on Drug Store Accommodations, which he would like to present.

DRUG STORE ACCOMMODATIONS.

BY OTTO E. BRUDER.

Every druggist is a professional man, no matter how many departments or side lines he may have in his pharmacy, and as such a professional man he has certain inherent responsibilities, which he should not shirk, but very, very often does.

One object of a person engaged in the drug business is, naturally, "making money"—but in the eagerness to make money, he very often forgets his most important object in life, his most important duty to his customers, which is the *professional* service due the public.

How many druggists today have *every* drug in their store of proper purity and strength, and have them properly preserved? Very few, indeed, and are you thereby doing justice to people that pay you for them? Are

you thereby doing justice to your physician in dispensing them, when they will not do the exact work he expects from his prescriptions?

How many druggists today have their business systematized—as regards keeping an up-to-date inventory (which will insure you against loss by fire); as regards a store index (enabling you or your clerks, especially a new clerk, to find things quickly); as regards a correct prescription record; as regards a knowledge of prices and selling goods; as regards a laboratory journal; as regards advertising; and as regards numerous other “duties,” and “necessities,” which are of direct money value to you?

How many druggists today are able to display the goods of their various departments properly, and know how to treat them, to prevent waste?

How many druggists today are giving time to the correct manufacture of galenicals, and to their own specialties,—two of the most important propositions with which you have to deal?

So I might ask a hundred questions of you pertaining to your “duties,”—and are you doing justice to yourself, to your family, and to your profession by neglecting your business in “every possible” way?

Your one and only duty as pharmacists is to study out how best you can serve the public and the physicians, with medicines and sick-room necessities. Pharmacy is no idle man’s calling, there is enough to be done in it to keep every one of us busy, every day of our lives.

Just for illustration, taking one of over a hundred “duties” you have, consider the subject of assaying:—Have you ever given a moment’s thought to where the prevailing idea comes from, among all classes of people, that “the doctor is only experimenting with his patient, that the patient gets no better, another doctor is called upon, with probably the same results, and so on?” It happens in almost every known disease. Now the doctor really is only experimenting, for a fact—but not because it is his intention, nor because he finds pleasure in it, nor yet to seek knowledge,—no, he experiments because he has to, for how does he know what alkaloidal per cent strength he will find in his tinctures, extracts and mixtures—how does he know, when prescribing belladonna, digitalis, squills, etc., whether his patients will get a preparation containing a minimum amount of activity, or the maximum (possibly poisonous) amount of activity? He does not know, hence he must of necessity go slow and experiment,—he is walking in the dark, and the humiliation which a physician experiences in the face of danger at the bedside through loss of time by needless experimenting, as a “knownothing,” is not justice to him. As pharmacists we should see to it that these things are not allowed to exist. What have we as pharmacists done, what have you done, to make medical action more exact and certain? The entire 40,000 druggists of the United States are men just like you in almost every respect, they are pharmacists, and what right have you, as a pharmacist, to neglect this

matter and think of nothing but money, money, money. You and every one of the 40,000, are supposed to do something in your lifetime, no matter how little, towards making medicines more exact, and thus assist the doctor in saving lives. When you, and your neighbor, and his neighbors and all the rest of the 40,000 druggists do almost nothing to advance pharmacy is it any wonder that some twenty manufacturing concerns have your store flooded with specialties, etc. It is no one's fault but your own.

Just one other duty I wish to call your attention to is this: Every drug store is so situated that it can draw the trade of about 400 families—if you will take the trouble to find out you will discover that, at the very least, 150 families never visit your store at all. You don't believe this now, because you don't know, but if you will look into the matter, you will find that it is true. Now these 150 families need something from your store each year, so don't you think it advisable to spend every spare moment of your time in devising some plan to get them to come to you?

Now knowing all these things to be true, that you are required to devote your entire time to the study and application of your professional calling, why do you fritter away your time selling postage stamps, running a postal station, upbuilding corporation businesses at the expense of your own, as the newspapers, express agencies, etc., being a poor-paid collector for the gas and electric companies, and general agent for all the rest of them—why do you do it?

Is that the way to gain patronage, is that the way to help the sick, is that the way to make yourself a better druggist? If you think so, you are on the wrong track. No one else does it, no one else but the druggist,—the *one* man, *above all others*, who should devote his time, his entire time, to his profession and study,—he allows the public to bother him every minute of the day and night with postage stamps, gas bills, telephoning, newspaper ads, etc., etc. If you need these "accommodations" to get business, please ask yourself where every other merchant gets his business from who don't have these accommodations? If you think you need them to show that you are polite, obliging, accommodating, etc., please take notice that grocerymen, butchers, dry goods men and all other business men are just as obliging, polite and accommodating as you are, and they *won't* sell "accommodations,"—and they have good businesses, too, and also know how to run them.

What in the world are we druggists, and city druggists especially, coming to? Why don't you take yourself severely to task and spend the great amount of time and energy you waste on the corporations' businesses, and Uncle Sam's also (with all due respect for Uncle Sam), in building up your own business and assist the cause of pharmacy; goodness knows pharmacy needs assistance of the best and highest kind from every druggist in the land. Of course you should be obliging to people, you

should treat them right, you should do all in your power to please them, cater to their wants, but, only so far as your legitimate business is concerned—you need not be their slave.

You will write something every day with your express business, your gas and newspaper agency, your postal station, etc.—but do you ever take the little time needed to write down your poison and liquor sales as prescribed by law?

Leaving out of the question the foolishness of your doing a corporation's business for a measly pittance of one-half to one per cent, and helping upbuild their business at the expense of your own—leaving out of the question that the patronage you derive is entirely imaginary instead of real—and leaving out of the question that people don't demand them, but the corporations do, who use you for an ill-paid tool,—leaving all these things out of the question,—it still remains a fact, a hard, horny, stubborn fact, that you are losing money, actually losing good cash money in two ways by doing it, and at the same time being a detriment to pharmacy. This is no theory—it is a proven business fact—and because you have never looked at it that way, shows (with due respect for your feelings), that you are a poor business man, and a poorer professional man.

You lose money, first, by making enemies of some of your customers with these accommodations,—any sensible druggist could not help that, for people will at times try your patience in these things, and because it slowly but surely and unconsciously makes you a "crank."

Second, you lose lots of good money by the unnecessary neglect of your legitimate business, as selling flavoring extracts and spices, systematizing your business as regards stock cards, indexing stock, inventory, advertising, and scores of other duties.

As once before stated, the commercial and professional part of pharmacy is so full of genuine activity which you should love, and which would make you a financial and professional success, that it should keep you busy every day of your life.

Individually, you need moral courage,—collectively you need organization work.

While by no means yet what is desirable, the case of the telephone affords an illustration:—Take it in Chicago, years ago, the druggist paid \$150 per year for an "accommodation" telephone, and the public was "expected" to pay 10c per call, but the druggist was afraid to collect it, for fear of "hurting his trade," and the result was that out of his profits the druggist paid the telephone monopoly \$150 a year. What have you today, thanks to organized effort; this same public *must* pay 5c per call, and strange to say gladly does it, and instead of the druggist being out \$150 a year, he makes an actual profit, and saves his valuable time also. And why should not people pay for such a necessity, and why should not the

telephone company pay rent for the use of your premises, and much more than they are now paying? How many druggists were "bit" recently by being "accommodating" to the Bank of America in Chicago, you all know,—and what sincere thanks hundreds of druggists in Chicago and Illinois got for being "accommodating" to the Chicago Tribune in its cocaine crusade you also know,—and how the papers in the United States on May 10 and 11, 1906, made a small, mean man of the druggist, with their "Drug Trust" talk, you also know,—but you keep right on with putting in accommodations—you are so ready to be a slave to the dear public, so ever ready to "knife" your brother druggist, so ever ready to start new drug stores, that you can't see any farther than the end of your own nose, and forget what it is to be a real merchant and a real business man.

History repeats itself—you know that the druggists were the only means used to introduce and upbuild the present monstrous patent medicine business, and now when their sale is established and assured, does the druggist reap the profits of his work? Now just wait until we druggists have succeeded in firmly establishing all these "trust and corporation accommodations," and see if you don't, at some time or other, come out at the small end of the horn.

Do you wonder any longer why the big down-town drug stores and department stores do such a large business? It's your own customers that trade there. Do you wonder any longer that manufacturing concerns take your legitimate business away from you, and you *complain* because these concerns are doing the doctor's thinking?—no; they are doing your thinking, they are doing your work, and they are taking your profits, because you are too lazy to be a druggist and too uneducated to know what your real duty is.

Do you wonder that you can't pay your clerk a decent salary, or yourself one either, for that matter, when your store is full of accommodations for the public, and instead of you paying your clerk a salary of \$100 or \$125 for profitable work he can and should do, he must spend his time on your profitless accommodations.

Do you think we will ever get sense?

If you can change the entire public's feeling on such a necessity as the telephone, why do you not do it with such unnecessary ones as all the rest are? If you can't get relief through your organization and are bound to have it, are bound to devote yourself to a financially and professionally successful drug business, just try the following scheme: prepare a type-written letter, and mail it to every family in your vicinity, and don't be afraid of results. The letter is as follows, and the wording you can change to suit your case:

DEAR SIR:—On account of the growth of my drug business I am compelled to give up my subpostal station, including the sale of stamps, my

gas and express agency, and also my newspaper and laundry business. The change will take place the first of next month. The attention which I must give to my prescription department, to my laboratory where we manufacture our medicines and chemicals, and to my large stock of sundries, makes this step absolutely imperative, if we want to continue to give the public absolutely first class A No. 1 service. We trust you will appreciate this effort on our part to give you the best possible service, as it can only be done by excluding the above-mentioned agencies. I have made arrangements with John Smith to take over these agencies, and he will supply your wants in them from the first of next month.

Respectfully yours,

SAM BROWN, *Druggist*.

Any druggist can "turn over" *all* his accommodations to some candy store, bakery, dry goods store, or some other more proper business place. He can then tend to his proper business, become a respected professional man, pay his clerks a just salary, shorten his working day at least four hours, and make more money besides—and he will not lose one customer, either.

Have you got the moral courage to do it? We have a grand mission to perform in life, every one of us druggists, and we must become masters of our business and of our profession, and not be the slaves of our exacting customers, nor the ill-paid tools of corporations. We have been sleeping long enough—now let's do something for ourselves and for pharmacy. I hope this Association will be the first one to go on record, either at this meeting or the one next year, as being very strongly opposed to any "drug store accommodation" (as mentioned in this paper), and that every member will have the manly courage to stand by the resolution. These accommodations are stumbling blocks in our progress and they must be removed, and the only way to remove a thing is to remove it!

MR. WELLS—I move you, Mr. Chairman, that the treasurer be directed to forward \$201 to the N. A. R. D., which is the amount of our regular annual contribution.

The motion was adopted without debate.

PRESIDENT GARVER—The next thing in order is the election of officers.

MR. METZGER—I move the election of the following for the ensuing year:

For President, H. C. Porter, of Rockford.

For 1st Vice President, John J. Boehm, Chicago.

For 2nd Vice President, J. E. Huber, Peoria.

For 3rd Vice President, W. D. Duncan, Ottawa.

There being no further nominations the Secretary was directed to cast the vote for the Association for the above, which was done, and they were declared duly elected.

Mr. Avery then nominated Prof. W. B. Day for Secretary and Mr. J. F. Shreve nominated Mr. R. N. Dodds for the position.

A ballot was taken which resulted in the election of Prof. Day.

Mr. Forsyth put Mr. George C. Bartells in nomination for Treasurer. There were no other nominations and the Secretary cast the vote of the Association for Mr. Bartells as Treasurer for the ensuing year.

Upon motion of Mr. Forsyth the salary of the Secretary was made the same for the ensuing year as for the previous year.

PRESIDENT GARVER—The next thing in order is the selection of a place for our next meeting.

Mr. George C. Lescher, of Galesburg, in a very neat speech, invited the Association to meet next year in Galesburg.

Upon motion of Mr. Loehr the invitation was accepted.

Upon motion of Mr. Stuchlik a vote of thanks was extended to the retiring President.

Upon motion of Mr. Wooten a vote of thanks was extended to the retiring Secretary.

Upon motion of Mr. Forsyth a vote of thanks was extended to the Mayor of Peoria, to the I. P. T. A., to the local lodge of Elks, the managers of the hotel, and a second vote of thanks was extended to the Central Union Telephone Company.

PRESIDENT-ELECT PORTER (in the chair)—I wish to express my thanks for the honor you have done me in electing me as your president for the ensuing year.

From the business which has been done at this session there will be a great deal to do in the way of legislation before we get together next year. We have recommended a law on the subject of narcotics which should be passed and we can pass it if we do our duty as druggists. I hope we will all pull together to the end that all of our recommendations heard today may be enacted into laws. I thank you sincerely.

At 6:30 p. m. the Association adjourned to meet next year in Galesburg.

DRUGGISTS IN ATTENDANCE AT THE 1906 MEETING

OF THE

ILLINOIS PHARMACEUTICAL ASSOCIATION.

J. Ellwood Lee Co.....	6 Dozen Pomeroy's Belladonna Plasters.

ENTERTAINMENT.

The entertainment committee, composed largely of Peoria Travelers, carried out its work most completely, and to the infinite pleasure and satisfaction of all concerned, the most careful attention being given to even the minutest details. The committee of Peoria ladies took care of the visiting ladies in so cordial and hospitable a manner as to cause special mention and commendation.

The carriage ride on the first afternoon conveyed the visitors to all of the chief places of interest in Peoria, and was thoroughly enjoyed. The reception to officers and members of the Illinois Pharmaceutical Association and the Illinois Pharmaceutical Travelers' Association, given in the large dining room at the National Hotel, will long be remembered as one of the most enjoyable events of the Convention. An orchestra of twelve pieces furnished the music and the program, being varied, afforded all a splendid opportunity for renewing acquaintances and spending a pleasant evening.

The launch ride, on the following afternoon, was largely attended and proved to be exceedingly interesting and enjoyable. On Wednesday afternoon a lecture was given to members of the Illinois Pharmaceutical Travelers' Association and their friends in Convention Hall, by Arthur Frederick Sheldon, on the subject of "Scientific Salesmanship," which brought out one of the largest crowds of travelers that has ever attended a State convention. Special mention should also be made of the complimentary band concert given in Glen Oak Park with the compliments of Post "E," Travelers' Protective Association, also the visit to one of the large distilleries in that city.

Fortunately, this year, the weather man was with us on our Field Day, magnificent summer weather prevailing, giving the opportunity of carrying out the program of events which had been scheduled.

A portion of the prizes, not assigned the various Athletic events, were drawn for by numbers, thus affording those who were not athletically inclined an opportunity to partake in some of the "good luck" which was distributed.

The Travelers' Association, at its meeting, proposed a hearty vote of thanks to Post "E" Travelers' Protective Association, the Peoria Telephone Company, Mr. Arthur Frederick Sheldon, the Peoria Retail Drug-gists' Association, and all those who individually and collectively assisted so materially in making the Peoria Convention such a success.

The Illinois Pharmaceutical Travelers' Association takes this opportunity of thanking, most heartily, the concerns who responded so liberally to its requests for assistance, and sincerely hopes that a practical appreciation on the part of the members of the two Associations may be shown.

ILLINOIS PHARMACEUTICAL TRAVELERS' ASSOCIATION.

J. M. SCHWALBE, *President*,

W. D. ROWLES, *Secretary and Treasurer*.

**TO THE MEMBERS OF THE
ILLINOIS PHARMACEUTICAL ASSOCIATION:**

The membership in our association has reached one thousand. But there are five thousand registered pharmacists in Illinois, all of whom are eligible to membership and should belong to our organization.

"In union there is strength" and largely in proportion to our numerical strength will our association command respect and be able to effectively promote the interests of pharmacy.

Let each member secure at least one new member during the coming year. A form for application for membership is attached. To the first member who sends in the application of a new member (with the dues) using the form cut from the Proceedings, the Secretary will present a copy of the National Formulary.

W. B. DAY,190...

**Secretary Illinois Pharmaceutical Association,
36 E. 12th St., Chicago, Ill.**

Dear Sir: I hereby make application for membership in the Illinois Pharmaceutical Association, and enclose One Dollar for the current year's dues.

Name in full.....

Street and Number.....

Proposed by **City**.....

..... **County**.....

Registered Pharmacists only are eligible to membership.

New members receive the Proceedings for the current year and a certificate of membership.

The next annual meeting will be held at Galesburg.

For Constitution and By-Laws, see page 11.

LOOK over the list of members of the association and notify the secretary if you find that your name has been spelled wrong or address erroneously given.

It is very important that all deaths and changes in address be reported to the secretary promptly.

All communications in regard to the Pharmacy Law should be addressed to Mr. Fred C. Dodds, secretary, State Board of Pharmacy, Springfield. Communications with reference to the association should be sent to the secretary, W. B. Day, 363 East 12th Street, Chicago.

If you are in need of a clerk, or if you are seeking employment write to the secretary of the association. He may be able to assist you and will charge you nothing for the service.

Send in your annual dues promptly at the beginning of the year. Do not wait for the secretary to send you a delinquent notice.

W. B. DAY, Secretary.

MR. RETAILER,

Dear Sir :

We beg to call your attention to *Tanglefoot Sticky Fly Paper*, why you should sell it and why you should use it liberally in your store.

First—Flies carry disease. *Tanglefoot* not only catches the fly but catches and destroys the disease germs.

Second—*Tanglefoot* is inexpensive—each sheet will hold 1,000 flies.

Third—*Tanglefoot* is not dead stock but will keep perfectly over season with ordinary care.

Fourth—*Tanglefoot* has been known and used for more than 20 years. You will have no apologies to make to your customers.

Fifth—There is a handsome profit to you.

THE FINE CUT-OUT DISPLAY
furnished with a gross of

WINE OF CARDUI

Is creating much comment. One of those displays in your store will bring you increased trade.

The profits in handling this popular medicine in quantity are unusually attractive. It costs you for cash only \$6.84 per dozen in gross lots.

ST. LOUIS :: :: :: NEW YORK

Forty-five Hundred Shares 8% Preferred Stock

of the

Emerson Drug Company

to be distributed gratuitously to retail druggists

To the Retail Druggists of the U. S. A. and Canada:

BALTIMORE, MD., June 19th, 1906.

Fifteen years ago we invited two thousand druggists to become stockholders in our Company, and we believe that those who availed themselves of the offer have been well pleased; at any rate we have been pleased to have them share our profits with us.

At a meeting of our stockholders held this day a resolution was adopted authorizing an increase in our capital stock of two hundred and fifty thousand dollars (\$250,000.00) preferred stock, bearing eight per cent. interest per annum, divided into ten thousand (10,000) shares, par value twenty-five dollars (\$25.00) each, redeemable at the option of the Company after January 1st, 1908, at twenty-six dollars per share and interest, if the Company so elects; but it will not be the policy of the present management to redeem said shares as long as they remain in the name of the druggists. Four thousand shares of this issue are reserved to be distributed to the retail druggists of the United States and Canada, and five hundred (500) shares for the druggists and chemists of England. Following are the conditions:

Announcement Extraordinary!

To the five retail druggists in the United States of America and Canada selling the largest amounts of BROMO-SELTZER within the period of twelve months beginning September 1st, 1906, and ending August 31st, 1907, we will give FIVE SHARES EACH (par value \$25.00 each) of the eight per cent. preferred stock above referred to.

To the next one hundred retail druggists selling the next largest amounts of BROMO-SELTZER in the same period, THREE SHARES EACH.

To the next four hundred retail druggists selling the next largest amounts in the same period, TWO SHARES EACH.

To the two thousand three hundred and seventy-five (2,375) retail druggists selling the next largest amounts of BROMO-SELTZER in the period mentioned above, we will give one share each; PROVIDED, HOWEVER, no share will be given any druggist selling less than one hundred and fifty dollars (\$150.00) of BROMO-SELTZER.

To the five hundred (500) retail druggists doing business in towns of less than twenty thousand (20,000) population and selling the largest amounts of BROMO-SELTZER within the period mentioned, one share each; PROVIDED, HOWEVER, no share will be given any druggist under this clause who sells less than one hundred dollars (\$100.00) of BROMO-SELTZER, and that no druggist in the two last classes can receive more than one share.

In case of a tie for any prize, we will give in lieu thereof, to each tying contestant, the par value of such prize in BROMO-SELTZER at wholesale prices.

Conditions

1. No druggist can enter the competition who sells BROMO-SELTZER for less than the prevailing prices in their respective localities.

2. On September 1st, 1906, each druggist, on entering this competition, must take stock of quantity of BROMO-SELTZER on hand that day; and on the last day of August, 1907, add to this amount the quantity of BROMO-SELTZER purchased during that period and deduct the amount on hand August 31st, 1907, thus leaving the net amount sold during the twelve months from September 1st, 1906, to August 31st, 1907, inclusive.

3. This statement sworn to before a Notary Public, together with the original bills showing the purchase of BROMO-SELTZER from the jobber, must be mailed to us on September 1st, 1907 (with postage enclosed for return of the wholesalers' bills).

4. Druggists having more than one store will be allowed to compete for as many prizes as they have stores, but under no circumstances can such druggists return all of their bills as representing the sales of one store; neither can druggists pool their sales for prizes.

Distribution of the stock will be made as soon as possible after the receipt of the druggists' affidavits, accompanied by their bills or invoices of purchases of BROMO-SELTZER for above period, said stock to participate in dividends from July 1st, 1907.

Respectfully,

Emerson Drug Company
